## Limited Review Report of Separate Interim Financial Statements

Translation from Arabic

**To The Board of Directors of CI Capital Holding for Financial Investments**

### Introduction

We have performed a limited review for the accompanying separate interim of financial position of CI Capital Holding for Financial Investments (Egyptian Joint Stock Company) as at March 31, 2026 and the related separate interim statements of profit or loss, comprehensive income, change in equity and cash flow for the three months then ended, and a summary of significant accounting policies and other explanatory notes. The company's management is responsible for the preparation and fair presentation of these separate interim financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these interim financial statements based on our limited review.

### Scope of Limited Review

We conducted our limited review in accordance with Egyptian standards on Review Engagements 2410, "Limited Review of interim financial statements performed by the Independent Auditor of the Entity". A Limited review of interim financial statements consists of making inquiries, primarily of person responsible for financial and accounting matters in the Company, and applying analytical and other limited review procedures. A Limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim financial statements.

### Conclusion

Based on our limited review, nothing has come to our attention that causes us to believe that the accompanying separate interim financial statements do not present fairly, in all material respects, the separate financial position of the company as at March 31, 2026 and of its separate financial performance and its separate cash flow for the three months then ended in accordance with Egyptian Accounting Standards.

## Notes to the Separate Interim Financial Statements. For the three months ended 31 March 2026

### 1. Background

#### 1-1 Incorporation

- CI Capital Holding for Financial Investments Company S.A.E was originally established as CI Capital Holding Company on April 9, 2005, under the provisions of Law No.95 of 1992 and its executive regulations. The company was registered in the Commercial Register on 10 April 2005 under No. 166798 and has obtained a license No. 353 from the Capital Market Authority on 24 May 2006. And the extraordinary general assembly meeting decided on 20 March 2019 to change the company's name to be CI Capital Holding for Financial Investments Company.

#### 1-2 Purpose of the company

- The company's purpose is to participate in the incorporation or to subscribe in the capital increase of entities which issue securities, management of investment funds, providing investment banking advisory services and to perform custody operation, under the provisions of Law No. 95 of 1992 and its executive regulations. The company has the right to have interest in or to participate with other corporations with similar business activities or which may assist the company in attaining its objectives in Egypt and outside Egypt. Also, the company has the right to merge or acquire those entities in accordance with the law and its executive regulations.
- The Company's duration is 25 years commencing from the registration date in the commercial register.
- The company's premises are located at Galleria 40 – 26th of July Corridor – Al Sheikh Zayed 6 of October – Giza Governorate – Arab Republic of Egypt.

#### 1-3 Authorization of the financial statements

- These financial statements were authorized for issue in accordance with the resolution of the board of directors on June 3, 2026.

### 2. Basis of preparation

#### 2-1 Statement of compliance

- These financial statements have been prepared in accordance with Egyptian Accounting Standards and relevant Egyptian laws and regulations.

#### 2-2 Functional and presentation currency

- These financial statements are presented in Egyptian pounds (EGP) which is the Company's functional currency.

#### 2-3 Use of estimates and judgments

- Preparing these financial statements in accordance with Egyptian Accounting Standards, requires management using judgements, estimates and assumptions that affect the application of the accounting policies and the amounts of assets, liabilities, income, and expenses. The estimates and assumptions depend on historical experience and other factors that company's management see. And the real results could be different from assumptions.
- Estimates and assumptions about them are reviewed on regular basis.
- Any changes in accounting estimates are recognized in the period where the estimates are changed whether the change affects only that period, or in the period of change and the future periods if the change affects them both.

**2-4 Fair value measurement**

- The fair value of financial instruments is determined based on the market value of the financial instrument or similar financial instruments at the date of the financial statements without deducting any estimated future selling costs. The value of financial assets is determined by the values of the current purchase prices for those assets, while the value of financial liabilities is determined by the current prices that can be settled by those liabilities.
- In the absence of an active market to determine the fair value of financial instruments, the fair value is estimated using various valuation techniques, taking into consideration the prices of the transactions occurred recently, and guided by the current fair value of other similar tools substantially - discounted cash flow method - or any other evaluation method to get resulting values that can rely on.
- When using the discounted cash flow method to evaluate the future cash flows are estimated based on the best estimates of management. And the discount rate used is determined in the light of the prevailing market price at the date of the financial statements that are similar in nature and conditions.

**2-5 Consolidated financial statements.**

- The company has subsidiaries and is required to prepare a consolidated financial statement in accordance with Egyptian Accounting Standards No.42 "Consolidated Financial Statements" and the article No.188 from the executive regulation of the corporate Law No.159 of 1981.
- For more comprehensive understanding of the group's financial position, operating performance and cash flow reference should be made to the group's consolidated financial statements.

**18. Employees Compensation Plan**

- The board of directors meeting held on September 12, 2024 and the ordinary general assembly of the company held on October 14, 2024, approved the cash incentive plan, for employees, directors and executive board members of CI Capital Holding for Financial Investments and its subsidiaries under the following terms:
  - The plan is a cash incentive program and does not grant beneficiaries any rights of any kind to the shares of the company or its subsidiaries.
  - The duration of this program is 3 calendar years, starting from January 1, 2023 to December 31, 2025, excluding the periods for payments of the program points values.
  - A percentage of 3% of the fair value of the company for the financial year ending in 2025 will be allocated to the aforementioned cash incentive program, and it will be distributed to the beneficiaries according to the terms and condition of eligibility, which include both quantitative and qualitative conditions, and it will be paid in cash. A fair value study will be prepared accordingly.
  - The cash incentive program will be terminated on December 31, 2025, in addition to the payment period for the beneficiaries, where cash payment on Egyptian pounds will occur after December 31, 2025, through the company's / subsidiary companies' resources.
  - The beneficiary's entitlement to the allocated amount is conditional upon their continued service with the company or its subsidiaries throughout the program's duration and the fulfillment of certain quantitative and qualitative conditions.
  - Below is a statement of the program's movements during the period / year:

- The accounting policies set out below have been applied consistently with those applied in all periods presented. On March 28, 2019, the Minister of Investment, and International Cooperation, on March 18, 2019, amended some provisions of the Egyptian Accounting Standards issued by Minister of Investment Decision No. 110 of 2015, which include some new accounting standards and amendments to some of the existing standards. The following is an overview of the most important accounting policies applied in preparing the company's financial statements.

**22-1 Foreign currency transactions**

- The Company maintains its records in Egyptian Pound. Transactions in foreign currencies are translated into the respective functional currencies of group companies at the exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at the reporting date. Foreign currency differences are generally recognized in Income Statement.

**22-2 Investments in subsidiaries**

- Subsidiaries are companies under the control of the company, so when the company hold the control on the financial and operating policies of these subsidiaries to obtain benefits from its activities, when assessing whether there is control it taken into consideration the current and potential voting rights at the date of preparation of the financial statements.
- Investments in subsidiaries are included at cost and deduct any impairment in value and charge it to income statement and that for each investment separately, only impairment loss will be refunded merely to limits do not exceed the carrying values and that would have been calculated if not taken an impairment loss in consideration.

**22-3 Property, plant, and equipment****22-3.1 Recognition and measurement**

- Items of property, plant and equipment are measured at historical cost less the accumulated depreciation and any accumulated impairment losses note no.(6), cost includes any direct costs related to the acquisition of the asset and for assets that are created internally, asset cost includes cost of raw materials, direct labor and other direct costs required for those assets to reach operational status and in position for the purpose which it was acquired for, as well as the costs of removal and re-settlement site in which those assets are exists.
- Purchased Computers programs, which represent an integral part and effective for devices are capitalized as part of those devices.
- The cost of certain items of property, plant, and equipment. have different useful lives, then they are accounted for as a separate item (major components) of property, plant, and equipment.
- Subsequent expenditure is capitalized only if it is probable that the future economic benefits associated with the expenditure will flow to the company.

**22-3.2 Capital gain or loss**

- Any gain or loss on disposal of an item of property, plant and equipment is recognized in profit or loss.

**22-3.3 Subsequent expenditure**

- The cost of replacing a component of one of the fixed assets as part of the fixed asset is considered when existence of adequate prediction of the future economic benefits associated with the process of the acquisition when it can estimate the cost of replaced component reliably with the exclusion of the net carrying cost of the components that have been replaced, cost of repair service and periodic maintenance is recognized in income statement when spent.

**22-3.4 Depreciation**

- All property, plant and equipment are stated at historical cost, less any accumulated depreciation, except for land which is not depreciated.
- Depreciation is charged to write off the cost of assets, over their estimated useful lives, using the straight-line method as follows:

| <u>Asset</u>            | <u>Estimated useful life</u> |
|-------------------------|------------------------------|
| Communication devices   | 2 years                      |
| Furniture and fixtures  | 7-10 years                   |
| Computers               | 3-5 years                    |

**22-4 Financial instruments****Policies applied from 1 January 2021**

- EAS No. (47) outlines regulations for the recognition of financial assets and liabilities and retained earnings on 1 January 2021 and the comparative figure did not adjust.
- Effective 1 January 2021, EAS No. (47) substantially changed accounting and financial reporting in three key areas: classification and measurement of financial assets, impairment, and hedge accounting.

**Business model, classification, and measurement****Business model**

- The company determines the nature of the business model by considering the way in which the financial assets are managed to achieve the business objective as determined by management.
- On initial recognition, financial assets are classified as measured at:
  - amortized cost ("AC");
  - fair value through other comprehensive income ("FVOCI"); or
  - fair value through profit or loss ("FVTPL").
- Financial assets are not reclassified subsequent to their initial recognition unless the company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

- A debt instrument is measured at amortized cost if it meets the following conditions:
  - it is held within a business model that has an objective to hold financial assets to collect contractual cash flows; and
  - the contractual terms of the financial asset result in cash flows that are solely payments of principal and interest on the principal amount outstanding ("SPPI").
- A debt instrument is measured at FVOCI if it meets both of the following conditions:
  - it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
  - the contractual terms of the financial asset result in cash flows that are SPPI.
- On initial recognition of an equity investment that is not held for trading, the company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an instrument-by-instrument basis.
- All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets.
- On initial recognition, the company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

**Business model assessment**

- The company assesses the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:
  - The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining an interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
  - How the performance of the portfolio is evaluated and reported to the company's management.
  - The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed.
  - How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
  - The frequency, volume, and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.
  - Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the company's continuing recognition of the assets.
- Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

**Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest**

- For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.
- In assessing whether the contractual cash flows are solely payments of principal and interest, the company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the company considers:
  - Contingent events that would change the amount or timing of cash flows;
  - terms that may adjust the contractual coupon rate, including variable-rate features;
  - Prepayment and extension features; and
  - Terms that limit the company's claim to cash flows from specified assets (e.g. non-recourse features).
- A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual paramount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

**Financial assets – Subsequent measurement and gains and losses**

|                                           |                                                                                                                                                                                                                                                                                                                                                      |
|-------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Financial assets at FVTPL</b>          | These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.                                                                                                                                                                                             |
| <b>Financial assets at amortized cost</b> | These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.                             |
| <b>Debt investments at FVOCI</b>          | These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss. |
| <b>Equity investments at FVOCI</b>        | These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are not never reclassified to profit or loss.                                               |

**Financial liabilities – Classification, subsequent measurement and gains and losses**

- Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held-for-trading, it is a derivative or it is designated as such on initial recognition.
- Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

**Derecognition****Financial assets**

- The company derecognizes a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.
- The company enters into transactions whereby it transfers assets recognized in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

**Financial liabilities**

- The company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.
- On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non-cash assets transferred or liabilities assumed) is recognized in profit or loss.

**22-5 Share capital****22-5.1 Ordinary stocks**

- Incremental costs directly attributable to the issue of ordinary shares are recognized as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with EAS (24) "Income Tax".

**22-5.2 Repurchase and reissuance of ordinary shares (treasury stocks)**

- When shares recognized as equity are repurchased, the amount of the consideration paid, which includes directly attributable costs is recognized as a deduction from equity. Repurchased shares are classified as treasury shares and are presented in the treasury share reserve. When treasury shares are sold or reissued subsequently, the amount received is recognized as an increase in equity and the resulting surplus or deficit on the transaction is presented within share premium.

**22-6 Expected Credit Losses**

- As allowed by EAS No. (47), the company applies the general approach impairment models for financial assets measured at amortized cost and FVOCI.
- the impairment loss for financial assets is measured in the consolidated statement of profit and loss within the credit loss expenses.

**General approach model**

- The general model impairment requirements of EAS No. (47) apply to all credit exposures that are measured at amortized cost or FVOCI, except the positions covered by simplified model as abovementioned.
- For purposes of the impairment policy below, these instruments are referred to as ("Financial Assets").
- The determination of impairment losses and allowance moves from an incurred credit loss model whereby credit losses are recognized when a defined loss event occurs under previous accounting standard, to an expected credit loss model under EAS No. (47), where allowances are taken upon initial recognition of the Financial Asset, based on expectations of potential credit losses at the time of initial recognition.
- The company uses three main components to measure ECL. These are Probability of Default ("PD"), Loss Given Default ("LGD") and Exposure at Default ("EAD").
- The probability of struggling the corresponding parties is derived from internal company assessments. The company allocates the probability of default for each exposure of the counterparty based on the economic environment in which the customer works, considering the relevant quantitative and qualitative information and quality available.
- Loss estimates when you stumble are independent of the client's probability of default. Loss models when tripping ensure that the main drivers of losses, including the quality of the warranty, are reflected in the loss factor when the specified stumble.
- Exposure when its stumbles is defined as the expected amount of credit risk to the counterparty at the time of its stumble. The exposure model is designed when you default on the life of the financial asset considering the expected payment files.
- EAS No. (47) Introduces a three-stage approach to impairment for Financial Assets that are not credit-impaired at the date of origination or purchase. This approach is summarized as follows:
  - **Stage 1:** The company recognizes a credit loss allowance at an amount equal to **12-month expected credit losses**. This represents the portion of lifetime expected credit losses from default events that are expected within 12 months of the reporting date, if credit risk has not increased significantly after initial recognition.
  - **Stage 2:** The company recognizes a credit loss allowance at an amount equal to **lifetime expected credit losses** for those Financial Assets which are considered to have experienced a significant increase in credit risk since initial recognition. This requires the computation of ECL based on lifetime probability of default, lifetime loss given default and lifetime exposure at default that represents the probability of default occurring over the remaining lifetime of the Financial Asset. Allowance for credit losses is higher in this stage because of an increase in credit risk and the impact of a longer time horizon being considered compared to 12 months in Stage 1.
  - **Stage 3:** The company recognizes a loss allowance at an amount equal to **lifetime expected credit losses**, via the expected recoverable cash flows for the asset, for those Financial Assets that are credit impaired. For further detail see following paragraph "Credit-impaired Financial Assets in Stage 3".
- The company calculates expected credit losses for each financial asset individually. Similarly, the determination of the need to transfer between stages is made on an individual asset basis.

**Significant Increase in Credit Risk**

- Under EAS No. (47), when determining whether the credit risk (i.e., risk of default) of a Financial Asset has increased significantly since initial recognition, the company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes quantitative and qualitative information based on the company's historical experience, credit risk assessment and forward-looking information (including macro-economic factors). The assessment of significant credit deterioration is key in determining when to move from measuring an allowance based on 12-month ECLs to one that is based on lifetime ECLs (i.e., transfer from Stage 1 to Stage 2).

**Credit-impaired Financial Assets in Stage 3**

- At each reporting date, the company reviews the indicators for impairment of receivables balances, to take the necessary actions to account for impairment against the amounts that may not be collected from customers.
- The study is necessary to ensure that clients own and maintain a portfolio of shares to cover the debt owed to them - enabling the company to take necessary measures to preserve the company's right in case of any amounts due from customers and failure or delay in payment. The calculation using aging reports will not be applicable on brokerage receivables as there is no specified or expected time frame for clearing or collection, however a provision is to be formed for the difference between debit due balance and the value of owned shares (collateral).
- For Financial Assets considered to be credit-impaired, the ECL allowance covers the amount of loss the company is expected to suffer. The estimation of ECLs is done on a case-by-case basis for non-homogeneous portfolios, or by applying portfolio-based parameters to individual Financial Assets in these portfolios via the company's ECL model for homogeneous portfolios.
- Forecasts of future economic conditions when calculating ECLs are considered. The lifetime expected losses are estimated based on the probability-weighted present value of the difference between the contractual cash flows that are due to the company under the contract; and the cash flows that the company expects to receive.

**Collateral for Financial Assets considered in the Impairment Analysis**

- EAS No. (47) requires cash flows expected from collateral and other credit enhancement to be reflected in the ECL calculation. The following are key aspects with respect to collateral and guarantees:
  - Eligibility of collateral, i.e., which collateral should be considered in the ECL calculation.
  - Collateral evaluation, i.e., what collateral (liquidation) value should be used; and
  - Projection of the available collateral amount over the life of a transaction.

**Critical Accounting Estimates**

- The accounting estimates and judgments related to the impairment of Financial Assets is a critical accounting estimate because the underlying assumptions used can change from period to period and may significantly affect the company's results of operations.
- In assessing assets for impairments, management judgment is required, particularly in projecting future economic information and scenarios where circumstances of economic and financial uncertainty, when developments and changes to expected cash flows can occur both with greater rapidity and less predictability. The actual amount of the future cash flows and their timing may differ from the estimates used by management and consequently may cause actual losses to differ from reported allowances.
- EAS No. (47) outlines regulations for the recognition of financial assets and liabilities and retained earnings on 1 January 2020 and the comparative figure did not adjust.

**22-7 Provisions**

- Provisions are recognized when the company has a legal or constructive current obligation as a result of a past event and it's probable that a flow of economic benefits will be required to settle the obligation. If the effect is material, provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and, where appropriate, the risks specific to the liability.
- Provisions are reviewed at the financial position date and amended (when necessary) to represent the best current estimate.

**22-8 Legal reserve**

- The Company's statutes provide for deduction of a sum equal to 5% of the annual net profit for formation of the legal reserve. Such deduction will be ceased when the total reserve reaches an amount equal to half of the Company's issued capital and when the reserve falls below this limit, it shall be necessary to resume.

**22-9 Cash Flows Statement**

- The statement of cash flows is prepared using the indirect method. For the purpose of preparing the cash flows statement, cash and cash equivalents consist of cash on hand, banks current accounts, demand deposits and credit banks which not exceed three months, bank overdraft balance which paid off when requested is considered a part of management of the company's cash as one of its items that appear discounted for the purpose of calculating cash and cash equivalent.

**22-10 Dividends Distribution**

- Dividends distribution is recognized as a liability in the financial statements in the period in which the dividends are declared.

**22-11 Operating revenues**

- The EAS No. (48) Supersedes the following Egyptian Accounting Standards:
  - a) EAS No. (8) "Construction Contracts" as amended in 2015.
  - b) EAS No. (11) "Revenue" as amended in 2015.
- More specifically, EAS No. (48) Sets out that the recognition of the revenue is based on the following five steps:
  - 1) Identify the contract with the customer.
  - 2) Identify the contractual obligation to transfer goods and/or services (known as performance obligations).
  - 3) Determine the transaction price.
  - 4) allocate the transaction price to the performance obligations identified on the basis of the stand-alone selling price of each good or service; and
  - 5) Recognize revenue when the related performance obligation is met.
- The company applies the EAS No. (48) five-step revenue recognition model to the recognition of fees and commissions income, under which income must be recognized when services are transferred, hence the contractual performance obligations to the customer has been satisfied.
- The company adopted EAS No. (48) With reference to the three business units in which the company operates at the date of adoption: Brokerage, Asset Management and Investment Banking.
- Accordingly, after a contract with a customer has been identified in the first step, the second step is to identify the performance obligation - or a series of distinct performance obligations - provided to the customer. The company examines whether the service is capable of being distinct and is distinct within the context of the contract. A promised service is distinct if the customer can benefit from the service either on its own or together with other resources that are readily available to the customer, and the promise to transfer the service to the customer is separately identifiable from other promises in the contract.

- The amount of income is measured based on the contractually agreed transaction price for the performance obligation defined in the contract. If a contract includes variable consideration, the company estimates the amount of consideration to which it will be entitled in exchange for transferring the promised services to a customer. Income is recognized in profit and loss when the identified performance obligation has been satisfied.
- Following the adoption of EAS No. (48), fee and commission income is presented in the income statement separately from fee and commission expense.
- The company acts as the main source and Egyptian Accounting Standard No. 48 requires that the costs of implementing contracts be presented separately in the income statement within fees and commission expenditures.
- The company provides custody and financial advisory services that give rise to performance fees and constitute a single performance obligation. The custody and financial advisory components are variable considerations such that at each reporting date the company estimates the fee amount to which it will be entitled in exchange for transferring the promised services to the customer.
- The benefits arising from the custody and financial advisory services are simultaneously received and consumed by the customer over time. The company recognizes revenue over time by measuring the progress towards complete satisfaction of that performance obligation, subject to the removal of any uncertainty as to whether it is highly probable that a significant reversal in the cumulative amount of revenue recognized would occur or not. For the management fee component this is the end of the service period. For performance fees this date is when any uncertainty related to the performance component has been fully removed.
- Management has assessed the impact of application of the new standard on the company's financial statements, analyzing each of its revenue streams by applying the five-steps model, and concluded there was no impact given the nature of and the accounting policy adopted for the company's revenues.

#### **22-11.1 Financial Consultancy Fees**

- Revenue for service delivery is recognized when the results can be accurately estimated to the extent to which the transaction is executed at the balance sheet date and the transaction is recorded in the books based on the accrual basis.

#### **22-11.2 Custody fees Commission**

- Custody fees commission that is provided on long-term basis on the period the service is provided.

#### **22-11.3 Interest income**

- Interest income is recognized in the income statement by using the effective interest rate method.

#### **22-11.4 Dividend income**

- Dividend income resulted from the Company's investments in shares and mutual funds is recognized in the statement of income on the date that the right to collect it is established.

### **22-12 Expenses**

#### **22-12.1 Interest expense**

- Interest expense on loans is recognized in profit or loss using the effective interest method.

#### **22-12.2 Income tax**

- Income tax expense comprises current and deferred tax. It is recognized in the income statement except to the extent that it relates to a business combination in the same period or in different period, out of profit and losses either to be recognized directly in equity or in OCI or in business combination.

**First: Current income tax**

- Current tax comprises the expected tax payable or receivable on the taxable income or loss for the year and any adjustment to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects uncertainty related to income taxes, if any. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends. Current tax assets and liabilities are offset only if certain criteria are met.

**Second: Deferred tax**

- Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for:
  - Taxable temporary differences arising on the initial recognition of goodwill.
  - Temporary differences on the initial recognition of assets or liabilities in a transaction that is not:
    - a- Business combination.
    - b- Does not affect either on the total net accounting income, or on the total net taxable income (Tax loss).
  - Temporary differences related to investments in subsidiaries, associates and joint arrangements to the extent that the company is able to control the timing of the reversal of the temporary differences and it is probable that they will not reverse in the foreseeable future.
- Deferred tax assets are recognized for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available, against which they can be used.
- Future taxable profits are determined based on business plans for individual subsidiaries in the company. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized; such reductions are reversed when the probability of future taxable profits improves. Unrecognized deferred tax assets are reassessed at each reporting date and recognized to the extent that it has become probable that future taxable profits will be available against which they can be used.
- Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, using tax rates enacted or substantively enacted at the reporting date.
- When the deferred tax is measured in the end of the financial period, the tax effects on the procedures followed by the company to payback the book value for its assets and liabilities.
- Deferred tax assets and liabilities are offset only if certain criteria are met.
- Deferred tax assets and liabilities are offset only if certain criteria are met.

**22-12.3 Borrowing Cost**

- Borrowing cost is recognized through income statement which incurred as a financing expense during the period with exception of, that borrowing cost that directly related to the acquisition or creation of assets is capitalized and added to the value of assets and amortized over the useful life of these assets.
- Borrowing cost is considered as part of the fixed asset costs related to it when the actual spending on the asset starts during the period in which the company bears the borrowing cost. Capitalizing of borrowing costs is stopped during the periods in which the asset processing is temporary stopped or when the asset is ready for use.

**22-13 Leasing contracts****The company as a lessor**

- The right to use asset and lease contract liability is recognized on the initial date of the lease contract, although the company has the right not to imply that neither for short-term lease contracts nor lease contracts in which the asset has low value, in this case lease payments regarding these leases are recognized expense, either with fixed installment over the life of the lease, or another regular basis, and the another regular basis is recognized if that basis is more representative of the benefit as lessee.
- The company has long-term lease contracts for some exhibitions and workshops, it is measured and presented in financial statements as follows;

**22-13.1 Initial measurement of the asset "the right to use"**

- The cost of the right to use asset consists of;
  - A. The initial measurement of lease contract liability, which is the current value of the unpaid lease payments on that date. Lease payments are deducted using the interest rate in the lease contract, in case that was not possible, the lessee must use interest rate of additional borrowing for the lessee.
  - B. Any lease contract payments have been made during or before the date the lease contract began without any lease incentives collected.
  - C. Any initial direct costs that were carried by the lessee.
  - D. Estimates of the costs carried by the lessee in dismantle and remove asset of the contract, restoring the site the asset existed in, to its original condition, or restoring the asset itself to its required condition, unless those costs are to be incurred to produce the stock, and the lessee will record these costs either on the date of the lease contract or as result of using this asset for period of time.

**22-13.2 Subsequent measurement of the asset "the right to use"**

- After the start date of the lease, the "right of use" is measured, and the cost model is applied where the right of use asset is measured at cost:
  - A. Minus any accumulated depreciation and any accumulated impairment losses.
  - B. Modified by any remeasurement of the lease obligation.

**22-13.3 Initial measurement of lease contract obligation**

- On the date of the start of the lease, the commitment of the lease is measured at the present value of the unpaid rent payments on that date. Lease payments are discounted using the interest rate implicit in the lease if that rate can be easily determined. If that rate cannot be easily determined, the lessee must use the company's additional borrowing rate as a lessee.

**22-13.4 Subsequent measurement of lease contract obligation**

- After the lease contract initial date, the following is to be done:
  - A. Increase the carrying amount of the obligation to reflect interest on the commitment to lease.
  - B. Reducing the carrying amount of the liability to reflect rental payments.
  - C. To reassess the carrying amount of the obligation to reflect any revaluation or adjustments to the lease or to reflect the fixed lease payments in its modified essence.
- The right of use asset and rental contract obligations are presented in the statement of financial position separately from other assets and liabilities.
- Lease contracts include the lessee is responsible for the maintenance and insurance of the leased asset, and the lease does not include any arrangements for the transfer of ownership at the end of the lease period.
- For a contract that includes a rental component with one or more rental or non-rental components (if any), compensation is allocated in the contract to each rental component based on the independent, proportional price of the rental component and the total independent price of the non-rental components. As a practical means, and within the scope permitted by the standard, the company, as a lessee, can choose, according to the category of the underlying asset in the contract, not to separate the non-rental components from the rental components, and then account for each rental component and any accompanying non-rental components as one rental component.

**22-14 Earnings per share**

- The Company presents basic earnings per share (EPS) data for its ordinary shares. Basic EPS is calculated by dividing the income statement attributable to ordinary shareholders of the Company by the weighted average number of ordinary shares outstanding during the period/year.

**22-15 Profit sharing to employees**

- According to the company's articles of incorporation, employees are entitled to 10% of the amount of cash dividends distributable to shareholders, provided it does not exceed the employees' total annual salaries. Employees' profit share is recognized as dividends through equity and as a liability in the financial period in which those dividends are approved by the company's shareholders. Since the legal obligation to distribute dividends to the company's employees is based on distributions to shareholders. However, the 10% of the dividends must be avoided for the employees before any dividend's distributions.

**23. Financial instruments and management of related risks**

- The Company is a subject for the following risks as a result of using these financial instruments:
  - Credit risk
  - Liquidity risk
  - Market Risks
- This disclosure presents information about to how extend the company is subject to mentioned risks the company's goals, policies and operations regarding the measurement and management of such risks and the company's capital management as well.
- The company's Board of Director is the responsible for setting the frame wok for the risk management process and its monitoring. The company's top management is the responsible for the setting and monitoring the risk management policies and report on a regular base to the mother company the risk management activities.
- The existing framework for the financial risk management represented in a combination of the various formal risk management policy in specific field and other informal polices.
- The internal audit committee monitor the compliance of the company's top management with policies and procedures adopted for the financial risk management and the adequacy of the current policies and procedures to cover the risk of financial liability.

**23-1 Credit risk**

- Credit risk is the risk of a person or an organization defaulting in the repayment of their obligations to the company in respect of the terms and conditions of the credit facilities granted to them by the company.
- The company mainly faces credit risks from client's receivable, notes receivable, sundry debtors, other assets, due from related parties and its financing activities including deposits in banks and financial institutions.

**First: Clients balances**

- The credit risk arises based on the company's policies, procedures and control structure related to risk management. The credit worthiness of the client is measured based on the credit performance card for each client separately and the credit limit is determined based on this evaluation a client's accounts to be always monitored. Provisions study is to be made at the financial position date.

**Second: Other financial assets and cash deposits**

- For credit risks arises from other financial assets of the company, which includes cash in banks and cash on hand the company is exposed to the risk of credit as a result of the other side default for payment with a maximum limit of the fair value of these assets.
- The finance department in the company is the responsible for managing the raised credit risk from cash in banks and financial institutions. The company decreases the credit risk through depositing its cash in good reputation banks. The management doesn't expect according to the information's available about the bank they deal with, that any of its debtors may default in repaying them.

**22-15.1 Maximum Credit risk**

**23-3 Market risk**

- Market risk is the risk that changes in market prices – such as foreign exchange rates, interest rates and equity prices – will affect the company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return. The company does not use derivatives to manage market risks.

**23-3-1 Interest rate risk**

- Interest rate risk arises from the fluctuation in the fair value of the future cash flows of the financial instrument as a result of changes in market interest rates. The Company's exposure to the risk of changes in market interest rates, or not, relates mainly to the Company's obligations at a floating rate of interest and interest-bearing deposits.

- Interest on floating rate financial instruments shall be re-priced from one period to another, provided that the interval does not exceed one year.

**24. Fair value measurement:**

- The fair value measurement of financial assets and liabilities is set up in accordance with these levels:
  - **First level:** The pronounced prices of fair value of financial instruments in active markets.
  - **Second level:** The pronounced prices of fair value of financial instruments in active market or the pronounced prices from the fund's manager in which the company is investing or any other evaluation methods in which all the material important inputs are supported with market information either in a direct or an indirect way.
  - **Third level:** Other evaluating methods which is not relayed on any factors with material important inputs to comparable market information.
- The following is the fair value of the financial instruments of the company which are measured at fair value on a periodic basis.

| <u>Financial assets</u>                                    | <u>Fair value as of</u><br><u>31 March 2026</u><br><u>EGP</u> | <u>Fair value as of</u><br><u>31 December 2025</u><br><u>EGP</u> | <u>Fair value</u><br><u>level</u> | <u>Main methods of</u><br><u>valuation and input</u> |

**25. Important events:**

- The Monetary Policy Committee of the Central Bank of Egypt decided at its meeting on Thursday, February 12, 2026, to reduce key interest rates by 100 basis points. Accordingly, the overnight deposit and lending rates and the Central Bank's main operation rate were reduced to 19.0%, 20.0%, and 19.5%, respectively; the discount rate was also reduced to 19.5%. Furthermore, the Central Bank's Board of Directors decided to reduce the reserve requirement ratio that banks are required to maintain with the Central Bank of Egypt from 18% to 16%.
- On February 28, 2026, a military escalation occurred in the Middle East, leading to significant disruptions in global shipping and increased transportation and energy costs. International reports indicated a virtual halt to the movement of a large number of ships within the Arabian Gulf, in addition to the cancellation and rescheduling of shipping routes and the closure or disruption of some air routes. There were global expectations of rising inflation levels, which could affect current interest rates worldwide, as well as fluctuations in foreign exchange rates, both upward and downward, during these events.
