Report on Review of Separate Interim Financial Statements To the Board of Directors of Juhayna Food industries S.A.E

Introduction

We have reviewed the accompanying 30 June 2026 separate interim financial statements of Juhayna Food Industries "An Egyptian Joint Stock Company", "the Company", which comprises:

- The separate statement of financial position as of 30 June 2026.
- The separate statements of profit or loss for the three-month and six-month periods ended 30 June 2026;
- The separate statements of comprehensive income for the three-month and six-month periods ended 30 June 2026;
- The separate statements of changes in equity for the six-month period ended 30 June 2026;
- The separate statements of cashflows for the six-month period ended 30 June 2026;
- The notes to the interim separate financial statements.

Management is responsible for the preparation and fair presentation of these interim separate financial statements in accordance with Egyptian Accounting Standards including the requirement of the Egyptian accounting standard number (30) "Interim Financial Reporting". Our responsibility is to express a conclusion on these separate interim financial statements based on our review.

Scope of Review

we conducted our review in accordance with the Egyptian Standard on Review Engagements number (2410), " Review of Interim Financial Statements Performed by the Independent Auditor of the Entity." A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters in the Company and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these separate interim financial statements.

Hazem Hassan

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying 30 June 2026 separate interim financial statements do not present fairly in all material respects, the unconsolidated financial position of the Company and of its unconsolidated financial performance and its unconsolidated cash flows in accordance with Egyptian Accounting Standards including the requirements of the Egyptian accounting standard (30) “ interim financial reporting” .

Emphasis of a matter

Without qualifying our conclusion, we draw attention to the mentioned in detail in Note (18) of the notes to the separate interim financial statements, which indicate that one of the companies merged into Juhayna Food Industries has a dispute regarding its entitlement to a tax exemption for a period of ten years, from 2009 to 2018. A decision was issued by the Appeals Committee denying the recognition of the tax exemption for the merged company and subjecting it to taxation for the years from 2009 to 2014. The company filed a lawsuit to contest the Appeals Committee’s decision, particularly regarding the cancellation of the tax exemption previously granted by a decision of the Chairman of the General Authority for Investment, the company, along with its legal and tax advisors, had previously assessed its entitlement to this exemption, and the conclusion reached was that it is more likely that the Company will obtain a favorable ruling. Accordingly, no provision has been recognized for any obligation on the Company related to this matter, and it has been treated as a contingent liability.

In addition the Company may participate in merge with or acquire other companies or entities engaged in similar or complementary activities whether within Egypt or abroad in accordance with the provisions of the applicable laws.

Registration in the Stock Exchange

The Company is listed in Schedule (A) the Egyptian Stock Exchanges.

3 Basis of preparation

3-1 Statement of compliance with laws and regulation

The separate financial statements have been prepared in accordance with the Egyptian Accounting Standards ("EAS") and in the light of prevailing Egyptian laws.

The financial statements were authorized for issue by the Board of Directors on August 4, 2026

3-2 Basis of measurement

- The financial statements have been prepared on the historical cost basis except some financial instruments are measured subsequently by either F.V or amortized cost.
- The financial statements have been prepared on going concern basis.

3-3 Functional and presentation currency

These separate financial statements are presented in Egyptian pound which represents the currency of the company.

3-4 Use of estimates and judgments

The preparation of separate interim financial statements in conformity with Egyptian Accounting Standards requires management to make judgments estimates and assumptions that affect the application of accounting policies and the reported amounts of assets liabilities income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised and in any future periods affected.

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes

Information about assumptions and estimation uncertainties that have a significant risk resulting in a material adjustment within the future financial statements are included in the following notes:

- Note (20, 26): impairment of trade and other debit balances.
 - Note (16): decrease in non-current assets.
 - Note (28): Recognition and Measurement of Current and Deferred Tax Assets and Liabilities.
- Note (26) : Provisions and Contingent Liabilities

1-4-3 Estimates and Judgements

The Company uses estimates and assumptions related to the future, the accounting estimates rarely match the related actual outcome, and below are the estimates and assumptions with significant risk that could lead to important adjustment to the book value of the assets and liabilities in the next financial years.

Expected credit losses "ECL" on accounts receivable's balances.

The Company uses provision records to calculate expected credit losses for commercial customers; the provision rates are based on the customer Company's delayed days.

The provision record is initially based on the observed historical Group default rates; the Company calculates the matrix accurately to adjust the historical credit loss experiment with forward-looking information. For example, if the expected economic conditions (i.e. GDP and the overall inflation rate) are expected to deteriorate over the next year, which may increase the number of defaults in the industrial sector, the historical default rates are adjusted. At each reporting date, the historical default rates are updated and observed and changes in future-oriented estimates are analyzed.

The assessment of the relationship between the historical default rates that are observed, the expected economic conditions and the expected credit losses is a significant estimate. The experiment of the historical credit loss and expectations of the Company's economic conditions may not represent the actual default of the customer's payment in the future.

Impairment of non-current assets

At the end of each financial period, the Company assesses whether there is an indication that the carrying amount of any asset is lower than the recoverable amount and the extent of any impairment loss that may have happened and requires recognition. Determining the existence of impairment indicators requires the best possible estimates available to management based on the information obtained from the Company and through the market depending on previous experience.

When determining indicators for impairment in the asset, the Company estimates impairment loss using suitable valuation methods. Determining indicators for impairment and estimation of impairment value depends on elements that may vary from time to another in a way that may affect management's estimates.

Recognition and measurement of current and deferred tax assets and liabilities.

Income tax, whether current or deferred, is determined by the Company according to the requirements of Tax law.

Company's profits are subject to current income tax which implies the usage of material estimates to determine the total tax burden on income, and because it is hard to surely determine the final tax in some transactions through the financial period so the Company recognizes the deferred tax liability according to the estimate of the extent of final applicability of the transactions to tax and also the extent of a possibility of formation of additional tax during tax inspection. And when there are differences between the final result of tax inspection and previously recorded amounts, these differences are recognized in income tax and current tax liability in the period in which these differences are realized as it is considered as a change in accounting estimates.

To recognize deferred tax assets, the management uses assumptions about the extent of availability of sufficient future tax profits that allows the usage of recognized deferred tax assets and the Company uses assumptions related to the tax rate prevailing on the date of the separate financial statements which is expected to settle all tax assets and liabilities in the future.

This process requires using several complex estimates to estimate and determine the tax brackets and temporary discountable tax differences and subject to tax arising from the difference between the accounting basis and tax basis for some assets and liabilities, in addition to estimating the possibility of using deferred tax assets arising from deferred tax losses and this is along with performing estimates about future tax profits and the future plans for the operations of the Company.

Contingent Liabilities and Provisions

Management studies events and indicators that may give rise to an obligation for the company during its normal operating activities. Management uses such estimates and key assumptions to assess whether the recognition criteria for a liability are met in the standalone financial statements.

This includes analyzing available information to determine whether past events have resulted in a present obligation on the company and estimating the expected future cash outflows required to settle that obligation, as well as its timing. In addition, management selects the appropriate measurement basis to determine the value of the obligation with reasonable reliability.

4 Material accounting policies

The company consistently applies the following accounting policies throughout the financial periods presented in the financial statements."

4-1 Foreign currency

Foreign currency transactions

Transactions in foreign currencies are translated to the respective functional currency at exchange rates at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies at the reporting date are retranslated to the functional currency at the exchange rate at that date.

Non-monetary assets and liabilities that are measured at fair value in a foreign currency are retranslated to the functional currency at the exchange rate at the date that the fair value was determined. Non-monetary items that are measured based on historical cost in a foreign currency are translated using the exchange rate at the date of the transaction. In general currency gain or loss.

4-2 Investments in Subsidiaries

Subsidiaries are entities controlled by the Company. Control exists when the Company has power over the investee's relevant activities for the purpose of deriving benefits from its involvement with the investee, has exposure or rights to variable returns from its involvement, and has the ability to use its power to affect the amount of those returns. Investments in subsidiaries are recognized at cost, less any impairment losses. Each investment is assessed individually for impairment, and any impairment loss is recognized in profit or loss.

An impairment loss is reversed only to the extent that the carrying amount of the asset does not exceed the carrying amount that would have been determined had no impairment loss been recognized.

4-3 Financial instruments

4-3-1 Financial assets

Classification:

The company classified its financial assets into the following measurement categories:

- Financial assets at fair value through profit or loss or through other comprehensive income and
- Financial assets measured at amortized cost.

The classification depends on the Company's business model for managing those financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains or losses will be recorded either in the statement of profit or loss or in other comprehensive income. For investments in equity instruments not held for trading, this will depend on whether the company has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income.

Recognition and derecognition:

The normal way of buying and selling financial assets on the trade date which is the date on which the company has a commitment to buy or sell the financial asset. A financial asset is derecognized when the contractual rights to receive cash flows from the financial asset expire or those rights are transferred in a transaction in which substantially all the risks and rewards of ownership of the financial asset have been transferred.

Measurement:

On initial recognition the company measures the financial asset at its fair value plus or minus in the case of a financial asset not at fair value through profit or loss statement transaction costs directly attributable to the acquisition of the financial asset. Transaction costs of financial assets at fair value through profit or loss are expensed in the statement of profit or loss.

Embedded financial assets are considered entirely embedded derivatives when determining whether their cash flows are solely payments of principal and interest.

Debt instruments:

The measurement of debt instruments depends on the company's business for managing the asset and characteristics of cash flow of the asset there are three measurement categories by which the company classifies debt instruments:

- **Amortized cost:** Assets held to maturity date to collect contractual cash flows where those cash flows represent only payment of original amount and interest are measured at amortized cost. Interest income from these financial assets is included in financing income using the interest rate method. Any gains or losses resulting from the disposal of investments are recognized directly in the statement of profit or loss and they are classified under other income / (expenses). Impairment losses are presented as a separate item in the statement of profit or loss.
- **Fair value through other comprehensive income:** Assets held for the purpose of collecting contractual cash flows and also for the purpose of selling financial assets where the cash flows of assets represent only payment of original amount and interest are measured at fair value through other comprehensive income. Changes in carrying amount are taken into other comprehensive income except for the recognition of impairment gains or losses interest income and foreign exchange gains and losses which are recognized in the statement of profit or loss. When the financial asset is disposed of the cumulative gain or loss previously recognized in other comprehensive income from equity is reclassified to profit or loss and recognized in other income/(expenses). Interest income from these financial assets is included in financing income using the interest rate method and impairment expense is presented as a separate item in the statement of profit or loss.
- **Fair value through profit or loss:** Assets that do not meet the criteria for depreciated cost or fair value through other comprehensive income are measured at fair value through profit or loss. Gains or losses on investment in debt instruments that are subsequently measured at fair value through profit or loss are recognized in profit or loss and are presented as a separate item in the statement of profit or losses in the period in which they arise.

Equity instruments

The company subsequently measures all investments in equity instruments at fair value. When the company's management chooses to present the fair value gains and losses on investments in equity instruments in the statement of other comprehensive income it is not subsequently reclassified to the statement of profit or loss after disposal of the investment. Dividends from these investments continue to be recognized in the statement of profit or loss as other income when the Company's right to receive dividends is established.

Changes in the fair value of financial assets at fair value through profit or loss are recognized in other income/(expenses) in the statement of profit or loss. Impairment losses (and reversals of impairment losses) on investments in equity instruments that are measured at fair value through other comprehensive income are not recognized separately from other changes in fair value.

Impairment:

The company assesses the expected credit losses associated with the investment in debt instruments which are carried at amortized cost and fair value through other comprehensive income. Where the applied impairment methodology depends on whether there is a significant deterioration in the credit risk of customers the company applies the simplified approach allowed by Egyptian Accounting Standard no. 47 which requires recognizing expected losses over the life of the initial recognition of customers.

4-3-2 Financial liabilities and equity instruments issued by the company

Classification as debt or equity

Financial instruments are classified as either financial liabilities or equity in accordance with the substance of the contractual arrangement at the date of issuance of these instruments.

Equity instruments

Equity instruments represent any contract that gives the company the right to the net assets of an entity after deducting all of its obligations.

Equity instruments issued by the company are recorded at the value of the proceeds received or the net value of the assets transferred deduct the costs of issuance directly attributable to the transaction.

Financial liabilities

Financial liabilities are classified as either financial liabilities "at fair value through profit or loss" or other financial liabilities.

Other financial liabilities

The company has classified its financial liabilities as trade payables due to related parties' borrowings and other credit balances which are initially measured at fair value net of transaction costs and are subsequently measured at amortized cost using the effective interest method with interest expense recognized on an effective yield basis.

The effective interest rate is a method of calculating the amortized cost of a financial liability and of allocating interest expense over the relevant period.

The effective interest rate is the rate that exactly discounts the estimated future cash payments through the expected life of the financial liability or where appropriate a shorter period.

4-3-3 De-recognition of financial instruments

The company derecognizes a financial asset only when the contractual rights to the cash flows from the asset expire or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another entity. If the company neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset the company recognizes its retained interest in the asset and an associated liability for amounts it may have to pay. If the company retains substantially all the risks and rewards of ownership of a transferred financial asset the company continues to recognize the financial asset and recognizes a collateralized borrowing for the proceeds received.

4-3-4 Effective Interest Rate Method

The effective interest rate method is used to calculate the amortized cost of financial assets that are debt instruments and to allocate the interest income over the relevant periods. The effective interest rate is the rate that exactly discounts the estimated future cash receipts (including all fees and payments or receipts between the parties to the contract that form an integral part of the effective interest rate, transaction costs, and any other premiums) through the expected life of the financial asset or, where appropriate, a shorter period.

Interest income is recognized on all debt instruments using the effective interest rate method, except for those classified as financial assets at fair value through profit or loss.

Non-derivative financial liabilities

The Company initially recognizes debt securities issued and subordinated liabilities on the date that they are originated. All other financial liabilities (including liabilities designated as at fair value through profit or loss) are recognized initially on the trade date which is the date that the Company becomes a party to the contractual provisions of the instrument. The Company derecognises a financial liability when its contractual obligations are discharged cancelled or expire.

The Company classifies non – derivative financial liabilities into the other financial liabilities' category. Such financial liabilities are recognised initially at the fair value plus any directly attributable transaction costs. After initial recognition these financial liabilities are measured at amortised cost using the effective interest method.

Other financial liabilities comprise loans and borrowings bank overdrafts and trade and other payables. Generally, trade payables are recorded at their nominal value.

Bank overdrafts that are repayable on demand and form an integral part of the Company's cash management are included as a component of cash and cash equivalents for the purpose of the statement of cash flows.

Cash and cash equivalents

Cash and cash equivalents comprise cash balances and call deposits with original maturities of three months or less from the acquisition date that are subject to an insignificant risk of changes in their fair value and are used by the Company in the management of its short-term commitments.

4-4 Goodwill

Recognition & Measurement

Goodwill is recognized at cost, representing the excess of the consideration transferred over the fair value of the identifiable assets acquired and liabilities assumed.

After initial recognition, acquired goodwill is measured at cost less any accumulated impairment losses. Impairment losses on goodwill are not reversed, and goodwill is not amortized.

4-5 Property plant and equipment

Recognition and measurement

Items of property plant and equipment are measured at cost less accumulated depreciation and accumulated impairment losses (note 16).

Cost includes expenditure that is directly attributable to the acquisition of the asset. The cost of self-constructed assets includes the cost of materials and direct labor any other costs directly attributable to bringing the asset to a working condition for their intended use the costs of dismantling and removing the items and restoring the site on which they are located and capitalized borrowing costs.

Purchased software that is integral to the functionality of the related equipment is capitalized as part of that equipment.

When parts of an item of property plant and equipment have different useful lives they are accounted for as separate items of property plant and equipment.

The gain and loss on disposal of an item of property plant and equipment is determined by comparing the proceeds from disposal with the carrying amount of property plant and equipment and is recognized net within other income/other expenses in profit or loss.

Subsequent costs

The cost of replacing a component of an item of property plant and equipment is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Company and its cost can be measured reliably. The carrying amount of the replaced component is derecognized. The costs of the day-to-day servicing of property plant and equipment are recognized in profit or loss as incurred.

Depreciation

Depreciation is recognized in profit or loss on a straight-line basis over the estimated useful lives of each component of an item of property plant and equipment. Land is not depreciated.

The estimated useful lives are as follows:

Description	Estimated useful life (Years)
Buildings & Constructions	13.3- 50
Machinery & Equipment	More than 1 year -13
Transportation & Transport Vehicles	5- 8
Tools	3 – 10
Empty plastic containers & pallets	5
Display refrigerators	5 years
Wells	25 or Wells useful life
Office equipment & Furniture	More than 1 year -10
Computers	3.33-5

Depreciation commences when the fixed asset is completed and made available for use. The depreciation method useful life and residual value are reviewed at each reporting date and adjusted as appropriate.

4-6 Projects under construction

Expenditures incurred on purchasing and constructing fixed assets are initially recorded in projects under construction until the asset is completed and becomes ready for use. Upon the completion of the assets all related costs are transferred to fixed assets. Projects under construction are measured at cost less accumulated impairment losses (note no. 16). No depreciation is charged until the project is completed and transferred to fixed assets.

4-7 Impairment of non-financial assets

The carrying amounts of the Company's non-financial assets other than biological assets investment property inventories and deferred tax assets are reviewed at each reporting date to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. For intangible assets that have indefinite useful lives the recoverable amount is tested annually for impairment.

An impairment loss is recognized if the carrying amount of an asset or cash – generating unit (CGU) exceeds its recoverable amount.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. In assessing value in use the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU. For the purpose of impairment testing assets are grouped together into the smallest group of assets that generate cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU.

Impairment losses are recognized in profit or loss. For other assets an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined net of depreciation or amortization if no impairment loss had been recognized.

4-8 Government grants

The company government grant is in the form of a loan at below prevailing market interest rate. The differences of the interest rates is initially recognized as deferred income and then recorded in the profit or loss in other income according to a regular systematic base over the loan period.

4-9 ROU

Items of ROU are measured at cost less accumulated amortization and accumulated impairment losses. Amortization is recognized in profit or loss on a straight-line basis over the estimated useful lives or the lease term which ever is less.

4-10 Lease Contracts

Operating lease contracts

The company recognizes, at the commencement date of each lease, a right-of-use asset and a corresponding lease liability measured at the present value of unpaid lease payments discounted using the interest rate implicit in the lease or the company's incremental borrowing rate. Lease payments include fixed payments, variable payments dependent on an index or rate, residual value guarantees, purchase options reasonably certain to be exercised, and termination penalties, where applicable. Right-of-use assets are initially measured at cost and depreciated on a straight-line basis over the shorter of the lease term or the useful life of the asset.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company incremental borrowing rate. Generally, the Company uses the incremental borrowing rate as the discount rate.

The Company determines the incremental borrowing rate by obtaining interest rates from several external financing sources and making certain adjustments to reflect rent terms and the leased asset.

Lease payments included in the measurement of the lease liability comprise the following:

- Fixed payments including fixed payments in its substance.
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as of the commencement date.
- Amounts expected to be payable under a residual value guarantee.
- The exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early.

Short-term Leases and Low-value Asset Leases

Short-term leases are leases with a lease term of 12 months or less at the commencement date and that do not contain a purchase option.

Leases of low-value assets represent assets that are individually of low value and are considered immaterial to the company's financial position as a whole.

Payments related to short-term leases and leases of low-value assets are recognized as an expense on a straight-line basis over the lease term in the statement of profit or loss.

Extension & Termination

In determining the lease term, management considers all relevant facts and circumstances that create an economic incentive to exercise an extension option, or not to exercise a termination option.

Extension options (or periods after termination options) are included in the lease term when the company is reasonably certain to exercise the extension option or not to exercise the termination option.

The company reassess the lease term if there is a significant event or change in circumstances that is within its control and affects its assessment.

Finance leases contracts (sale and lease back):

If an entity (the lessee) transfers an asset to another entity (the lessor) and re-leases the asset the entity must determine whether the asset is being accounted for as a sale transaction on that asset or not.

In case the transfer of the asset is not a sale transaction

The lessee must continue to recognize the transferred asset and must recognize a financial liability equal to the proceeds of the transfer.

The company as a Lessor:

At the inception of, or upon modification of, a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of the relative standalone price of the lease component.

At the commencement of the lease, the Company shall classify each of its leases as either an operating lease or a finance lease.

To classify each lease, the Company performs an overall assessment of whether the lease transfers substantially all the risks and rewards incidental to ownership of the asset. In such case, the lease is a finance lease; otherwise, it is an operating lease. As part of this assessment, the Company takes into consideration certain indicators, such as whether the lease term represents the major part of the economic life of the asset. The company recognizes lease payments received under operating lease agreements as revenue on a straight-line basis over the lease term.

4-11 Inventories

Inventories of raw materials supplies packing materials and spare parts are measured at the lower cost or net realizable value. The cost of inventories is based on the weighted average principle and includes expenditure incurred in acquiring the inventories production or conversion costs and other costs incurred in bringing them to their existing location and condition. Net realizable value is the estimated selling price in the ordinary course of business, less estimated costs of the completion and selling expenses.

The inventory is measured at the lower of cost which is determined based on the cost of last process reached or net realizable value.

Finished production is measured at the lower manufacturing cost or net realizable value. The manufacturing cost comprises raw materials direct labor and cost includes an appropriate share of overheads based on normal operating capacity.

4-12 Impairment of Non derivative financial assets

The company applies the expected credit loss model (ECL) to measure impairment loss on its financial assets.

A loss allowance is recognized for expected credit losses on investments in debt instruments that are measured at amortized cost or at FVTOCI. The company uses the simplified approach and always recognizes lifetime expected credit losses (ECL).

4-13 Defined contribution plans

The Company contributes to the government social insurance system for the benefits of its personnel in accordance with the social insurance Law No. 79 of 1975 and its amendments. Under this Law the employees and the employers contribute into the system on a fixed percentage – of- salaries basis. The Company's contributions are recognized in the income statement using the accrual basis of accounting. The company's obligation in respect of employees' pensions is confined to the amount of contributions.

4-14 Provisions

A provision is recognized if as a result of a past event the Company has a present legal or constructive obligation that can be estimated reliably and it is probable that an outflow of economic benefits will be required to settle the obligation.

4-15 Revenue

Sales of goods

Revenue for sale of goods is recognized based on the transaction price of the received or receivable payment. The transaction price is determined considering returns, trade discounts and volume rebates. Revenue is recognized in the income statement when pervasive evidence exists of the settlement of contractual performance obligation by transfer of goods to the customer. Pervasive evidence usually exists in the form of an executed sales agreement. Settlement of the performance obligation has pervasively occurred when control over the goods has been transferred to the customer associated costs and possible return of goods can then be estimated reliably and there is no continuing control or involvement with the goods.

Discounts are recognized as a reduction of revenues when they will probably be granted and the discounts amount can be measured reliably. When discounts are granted over past performance obligations a provision is recognized in the balance sheet. In case a discount will be granted over future performance obligations a contract liability will be recognized.

No revenue is recognized if there is significant uncertainty regarding the collectability of the consideration or the associated costs or expected sales returns, or where the company retains continuing managerial involvement or effective control over the goods.

Revenue is measured based on the consideration specified in the contract with a customer.

Determination of the transaction price

The company determines the transaction price in its contracts with customers. In making this determination, the company estimates the effect of any variable consideration in the contract, such as discounts, rebates or penalties, and the existence of any significant financing component or any non-cash consideration specified in the contract.

Export subsidy revenue

Government subsidies on export sales are recognized as a percentage of the value of exported goods when there is appropriate assurance that the company will deserve support and all the necessary conditions for obtaining support are met.

4-16 Finance income and finance costs

Finance income comprises interest income from funds invested. Interest income is recognized as it accrues in profit or loss using the effective interest method.

Finance costs comprise interest expense on borrowings fair value losses on financial assets at fair value through profit or loss impairment losses recognized on financial assets.

Borrowing costs that are not directly attributable to the acquisition construction or production of a qualifying asset are recognized in profit or loss using the effective interest method.

Foreign currency gains and losses are reported on a net basis as either finance income or finance cost depending on whether foreign currency movements are in a net gain or net loss position.

Income tax

Income tax on the profit or loss for the year comprises both current tax and deferred tax.

Current tax

Current tax is recognized in the income statement except to the extent that it relates to items recognized directly in equity in which case it is recognized in equity. Current tax is the expected tax payable on the taxable income for the period using tax rates enacted or substantially enacted at the balance sheet date and any adjustment to tax payable in respect of previous years.

Deferred tax

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is measured based on the expected manner of realization or settlement of the carrying amount of assets and liabilities using tax rates enacted or substantively enacted at the reporting date.

A deferred tax asset is recognized for unused tax losses tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized at the next years.

4-17 Legal reserve

According to the Companies Law requirements and the statutes of the Company 5% of the annual net profit shall be transferred to a legal reserve until the accumulated reserve reaches 50% of the issued share capital. The reserve is un-distributable; however, it can be used to increase the share capital or to offset losses.

If the reserve falls below the defined level (50% of the issued share capital) then the Company is required to resume setting aside 5% of the annual profit until it reaches 50% of the issued share capital. The legal reserve is non-distributable.

4-18 Employee termination benefits

The Company does not have a pre-established retirement plan; however, termination benefits are recognized as an expense when the Company is clearly committed—without realistic possibility of withdrawal—to a detailed formal plan to terminate employment before the normal retirement date, in accordance with Labor Law No. (14) of 2025 and other relevant Egyptian legislation.

4-19 Segmentation reporting

A segment is a group of associated assets and processes that are characterized by risks and rewards that differ from those of other segments or within a same economic environment with risks and rewards that are related to other segments operating in a different economic environment. All the operating results of the operating segments are reviewed regularly by the company's business leaders where the company makes decisions about the resources allocated to the segments and assesses their performance, which provides detailed financial information.

The group has (2)operational segments which represent segments for which financial reporting is provided to high management. These reports present different products and services and are managed separately because they require different technology and marketing strategies. The operation of each sector is reported below:

Segmentation reports

Dairy sectors

Juice & concentrate sector

Operations

Manufacture and sell dairy products & its derivatives

Manufacture and sell various products of juice & fruit concentrates

4-20 Related Party Transactions

Transactions with related parties conducted by the Company in the ordinary course of business are recognized in accordance with the terms approved by the Board of Directors.

5 Determination of fair value

A group of the Company's accounting policies and disclosures require determination of fair value for both financial and non- financial assets and liabilities.

The fair value of financial assets is determined based on the current purchase prices of those assets, while the fair value of financial liabilities is determined based on the current prices at which those liabilities could be settled.

If there is no quoted price in an active market, then the Company uses valuation techniques that maximize the use of relevant observable inputs and minimize the use of unobservable inputs. The chosen valuation technique incorporates all of the factors that market participants would take into account in pricing a transaction.

When the discounted cashflow method is used as a valuation technique, future cash flows are estimated based on the best estimates of management. The discount rate used is determined with reference to the prevailing market rate at the date of the financial statements for similar financial instruments in terms of nature and terms.

Disclosures are provided in the notes to the financial statements regarding assets and liabilities whenever possible, as well as any additional information about the assumptions used in determining fair value in the notes related to those assets and liabilities.

The carrying amount of the company's monetary instruments measured at amortized cost approximates their fair value.

When measuring the fair value of an asset or a liability, the company uses observable market data the extent possible .

Fair values are categorized into different levels in a fair value hierarchy based on the inputs used in the valuation techniques as follows:

Level 1	Quoted prices (unadjusted) in active markets for identical assets or liabilities.
Level 2	Inputs other than the quoted prices included in Level 1 that are observable for the asset or liability either directly (i.e. as prices) or indirectly (i.e. derived from prices).
Level 3	Inputs for the asset or liability that are not based on observable market data (unobservable inputs)

- If the inputs used to measure the fair value of an asset or a liability fall into different levels of the fair value hierarchy, then the fair value measurement is categorized in its entirety in the same level of the fair value hierarchy as the lowest level input that is significant to the entire measurement.

Transfers between levels of the fair value hierarchy are recognized at the end of the reporting year during which the change has occurred.

5-1 Non-derivative Financial Liabilities

The fair value for disclosure purposes is determined based on the present value of expected future cash flows, including interest payments, discounted using the effective interest rate at the separate interim financial statements date.

6 Cost of sales

	Period from 1/1/2026 to 30/06/2026 <u>L.E</u>	Period from 1/1/2025 to 30/06/2025 <u>L.E</u>	Period from 1/4/2026 to 30/06/2026 <u>L.E</u>	Period from 1/4/2025 to 30/06/2025 <u>L.E</u>

- * On 30 November 2021, the Board of Directors of Juhayna Food Industries Company resolved—based on a request from Ajrou—to cancel the partnership agreement entered into between Ajrou and the other companies. The Board also approved the liquidation of Ajrou; however, no Extraordinary General Assembly meeting was called to ratify this resolution. Subsequently, on 18 February 2024, the Board of Directors of Juhayna approved the agreement signed with the foreign shareholder, under which the foreign shareholder agreed to transfer its shares to Juhayna Food Industries Company without any financial consideration. As a result, Ajrou is to become wholly owned by Juhayna food industries. The legal procedures for the transfer of ownership have not yet been completed.

Juhayna Food Industries
(An Egyptian Joint Stock Company)

**** Debt Instruments At Amortized Cost - Fixed Return Listed in Market**

The Financial asset is held within a business model whose objective is to hold assets in order to collect contractual cash flows. The objective of the business model is to retain the financial assets to collect contractual cash flows representing the principal amount invested and the related interest income.

Sales are considered an incidental and exceptional event for the purpose of this model, and in accordance with the conditions set out in the standard : which relate to the principal amount of the investment and the related interest income.

- Deterioration in the creditworthiness of the issuer of the financial instrument.
- Low level of sales in terms of value, as the Bank's business model objective does not permit, when applicable, the disposal of these instruments before their contractual maturity, except within the limits allowed by the standard, namely (sales that are insignificant in value, infrequent, or close to maturity).
- Clear documentation should be maintained to support any sale and its compliance with the standard .

In accordance with Prime Minister Decree No. 4575 of 2023, debt instruments issued by the Egyptian government, as well as current accounts held with Egyptian banks in local currency are exempt from the recognition and measurement of expected credit losses.

18-Tax status

Pre-Merger Period

A: Juhayna Food Industries Company (the Merging Company)

1- Corporate Income Tax:

The Company submits tax returns within the legal deadlines in accordance with the provisions of Income Tax Law No. 91 of 2005 and its amendments, and Unified Tax Procedures Law No. 206 of 2020 and its amendments.

Period from commencement of activity on 17/01/1996 to 31/12/2019:

The competent tax authority conducted a tax inspection for this period. All tax disputes were resolved, and the Company paid the due taxes.

Years 2020–2025:

Tax returns were submitted on time. The Company has not been requested for inspection by the tax authority.

2- Payroll Tax:

Period from commencement of activity on 17/01/1996 to 31/12/2022:

The competent tax authority inspected this period. All tax disputes were resolved, and the Company paid the due taxes.

Years 2023–2025:

Quarterly adjustments and returns are submitted within the legal due dates.

3- Stamp Duty:

Period from commencement of activity on 17/01/1996 to 31/12/2022:

The competent tax authority inspected this period. All tax disputes were resolved, and the Company paid the due taxes.

Years 2023–2025:

Monthly returns are submitted on time in accordance with the law. No inspection have been conducted.

4- Sales Tax / Value-Added Tax (VAT):

Period from commencement of activity on 17/01/1996 to 31/12/2020:

The competent tax authority inspected this period. All tax disputes were fully resolved, and the Company paid the due taxes.

Years 2021–2025:

Tax returns are submitted on time. Preparation for inspection is in progress.

5- Tax Withheld at Source:

The Company regularly submits quarterly returns within the legal due dates.

B: International Modern Food Industries Company

1- Corporate Income Tax

Commencement of Activity:

- The Company commenced operations on 31/05/2008 as stated in its tax card.
- The company is subject to Law No. 8 of 1997 (Investment Guarantees and Incentives Law), and was exempt from corporate income tax until 31/12/2018.
- The Company submits tax returns in accordance with Income Tax Law No. 91 of 2005 and its amendments, and Unified Tax Procedures Law No. 206 of 2020 and its amendments.

Years 2009–2014:

- The Large Taxpayers Center conducted a book inspection for these years and according to a re- inspection memorandum dated 20/11/2019, the automatic tax exemption certificate issued by the competent authority (General Authority for Investment) was not acknowledged.
- The tax authority issued a tax assessment (Form 19 Taxes), and the Company filed an objection within the legal timeframe.
- The dispute was referred to the Tax Appeal Committee under appeal No. 580/2022, which, in its session dated 30/08/2022, upheld the authority's decision not to recognize the tax exemption.
- Although the committee's decision lacked sound legal justification, it nonetheless obligates the Company to pay the tax, even if contested in court, as per the last paragraph of Article 64 of Law No. 206 of 2020 (Unified Tax Procedures Law).
- Therefore, it is recommended that the Company pays the due tax in execution of the appeal committee's decision to avoid administrative seizure of bank accounts, while continuing legal proceedings before the administrative judiciary.
- Based on the legal advisor's report submitted to us, the Company is entitled to the tax exemption.
- We support this conclusion — from our legal and technical perspective — regarding the Company's right to exemption for the disputed years, relying on the automatic exemption certificate issued by the General Authority for Investment dated 23/12/2008, Supporting letters dated 10/11/2009 and 25/03/2021, The Appeal Committee's decision violates Article 64 of Investment Law No. 8 of 1997, and Circulars from the Tax Authority (Nos. 27/2006 and 21/2015) obliging all affiliated entities to apply exemptions stated in certificates issued by the Investment Authority.
- The Company submitted a request on 13 December 2022 to bring the case before the Dispute Resolution Committee, and the file is currently under review.
- On December 13, 2022, the company submitted a request to the Dispute Resolution Committee to review the file for those years, and the file is currently under discussion and review before the committee.
- On November 3, 2022, a lawsuit was filed before the Administrative Court to consider the dispute. On July 17, 2025, a hearing was held to examine the company's request, and the case was referred to an expert for review. The expert's sessions were attended in December 2025, and the case was reserved for the issuance of the expert's report to be submitted to the court; however, the report has not yet been issued.

Years 2015–2018:

A provisional assessment (Form 19) was received and objected to within legal time limits. A decision was issued to perform an actual inspection.

Years 2019–2025:

Tax returns were submitted on time. The Company has not been selected for inspection.

2- Payroll Tax:

Period from 31/05/2008 to 31/12/2022:

The tax authority completed its inspection for this period. Disputes were resolved and the Company paid the due taxes.

Years 2023–2025:

The Company submits quarterly returns and the annual reconciliation within the legal due dates.

3- Stamp Duty:

Period from commencement of activity until 31/12/2022:

The Company was inspected and paid the due tax.

Years 2023–2025:

The inspection is being under preparation .

4- Sales Tax / Value-Added Tax (VAT):

The Company submits monthly VAT returns on time.

Period from commencement of activity until 31/12/2020:

The tax authority inspected the Company and the due differences were paid.

Years 2021–2025:

VAT returns are submitted on time and no inspection has been conducted.

5- Withholding Tax:

The Company regularly submits quarterly returns within the legal due dates.

C: The Egyptian Dairy Products Company

1- Corporate Income Tax:

The Company submits tax returns within the legal deadlines in accordance with Income Tax Law No. (91) of 2005 and its amendments, and the Unified Tax Procedures Law No. 206 of 2020 and its amendments.

Period from the start of operations on 03/10/2001 to 31/12/2004:

The competent tax authority inspected the Company for this period. Tax disputes were resolved and the due taxes were paid.

Years 2005–2008:

The tax authority has not inspected the Company for this period. Tax returns are submitted on time in accordance with the law.

Years 2009–2017:

24-3 Deferred Government Grants

The company obtained a loan amounting to EGP 91.4 million from the Commercial International Bank (CIB) in August 2022. The full loan amount of EGP 91.4 million was utilized under the Central Bank of Egypt's initiative to support industrial companies. According to the initiative the loan was granted at a preferential interest rate of 8%, which is lower than the prevailing market rate for similar loans which averaged 19.25% at the date of the loan.

The government grant arising from the interest rate difference amounted to EGP 2 199 657 analyzed as follows:

- (a) Deferred income – non-current liabilities: EGP 45 810
- (b) Deferred income – current liabilities: EGP 1 036 506
- (c) Other income – statement of profit or loss: EGP 1 117 341 during the period ended 30 June 2026 No income was recognized during the comparative period. (Note 7)

The following is a statement of loan balances and deferred income for government grants: -

	Less than one year	More than one year	Total
	<u>L.E</u>	<u>L.E</u>	<u>L.E</u>
Loan	22 850 000	11 425 000	34 275 000
Less: Deferred (grant) liabilities	(1 036 506)	(45 810)	(1 082 316)
Balance as of 30/06/2026	21 813 494	11 379 190	33 192 684

25- Bank credit facilities

The balance of this item amounting to EGP 5 737 536 699 as of 30 June 2026 (compared to EGP 5 111 561 262 as of 31 December 2025) represents the utilized credit facilities granted by several banks including:

- CIB: EGP 2 245 213 883
- HSBC: EGP 759 925 654
- QNB: EGP 532 322 669
- AWB: EGP 292 817 043
- KFH : EGP 745 612 388
- NBD: EGP 1 161 645 062

The total credit facilities amount to approximately EGP 5 737 billion with a variable interest rate (corridor rate $\pm$ 0.25%) secured by promissory notes obtained by the banks providing these facilities to the company.

26- Provisions

26-1 Provision for claims

Description	Balance at 01/01/2026	Used during the period	No longer required provisions	Balance at 30/06/2026

	<u>L.E</u>	<u>L.E</u>
Current income tax	321 025 032	157 623 535
Deferred tax expense	(18 885 283)	11 820 595
	302 139 749	169 444 130

28-5 Unrecognized Deferred Tax Assets

	30/06/2026	31/12/2025
	<u>L.E</u>	<u>L.E</u>
Difference Between Amounts Paid to Acquire Investments and the Value of the Investments in the Merged Companies	5 284 677	1 571 735
Deferred Tax of decrease trade receivables	1 396 591	1 396 591
Deferred Tax of decrease in related parties	807 269	747 826
Deferred Tax of decrease in cash and Cash Equivalents	698 953	605 911
	<u>8 187 490</u>	<u>4 322 063</u>

The Company has not recognized deferred tax assets for these amounts until management completes the necessary data required to meet the Tax Authority's requirements. The amounts represent the excess of the acquisition cost of certain fixed assets (excluding land) over their book values, which were merged into Juhayna from Al Marwa Food Industries Company.

29- Financial instruments

Financial risk management

Overview

The company has exposure to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk.

Risk management framework

The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board is responsible for developing and monitoring the Company's risk management policies.

The Company's risk management policies are established to identify and analyse the risks faced by the Company to set appropriate risk limits and controls and to monitor risks and adherence to limits. Risk management policies and systems are reviewed regularly to reflect changes in market conditions and the Company's activities. The Company through its training and management standards and procedures aims to develop a disciplined and constructive control environment in which all employees understand their roles and obligations.

The Company's Board oversees how management monitors compliance with the Company's risk management policies and procedures and reviews the adequacy of the risk management framework in relation to the risks faced by the Company. The Company's Board is assisted in its oversight role by Internal Audit. Internal Audit undertakes both regular and ad hoc reviews of risk management controls and procedures the results of which are reported to the B.O.D.

Credit risk

Credit risk is the risk of financial loss to the company if a customer or counterparty fails to meet its contractual obligations. It arises principally from trade receivables and financial investments.

<u>Aging Category</u>	<u>Total Balance</u>	<u>Expected Credit Loss</u>
Not due	309 971 365	119 800
Due from 1 to 120 days	127 842 040	404 242
Due more than 120 days	1 524 283	685 927
Total	<u>439 337 688</u>	<u>1 209 969</u>

Trade and other receivables

The company has dealt with a major client (related party) who in turn distributes credit risks to a number of clients with strong and stable financial positions. The company also deals with its clients through contracts and agreements signed with them. Additionally, the company (related party) reviews the credit limits granted to its clients periodically and obtains adequate collateral from its clients. A client is considered in default if the payment is delayed for 120 days.

Credit risk

Exposure to credit risk

The carrying amount of financial assets represents the maximum credit exposure. The maximum exposure to credit risk at the reporting date was:

	Note	Carrying amount	
		30/06/2026	31/12/2025
		<u>L.E</u>	<u>L.E</u>
Trade and other receivables	(20)	1 092 952 050	638 296 333
Cash	(21)	779 410 800	705 820 715
Related Parties	(1-34)	2 256 300 452	2 087 033 755
Investment measured at amortized cost	(15)	488 527 498	647 717 862

The Company assesses credit risk of its customers based on forward-looking information related to expected credit losses, including the evaluation of default risk using external sources and publicly available information, in addition to data derived from the company's historical experience and management judgment. Credit risk is measured using quantitative and qualitative approaches to assess customers' ability to meet their contractual obligations and is benchmarked against external credit rating sources.

Credit risk on receivable and bank balances is limited as:

- Cash balances and time deposits held with banks that have a credit rating ranging from B to BBB+.
- The Group applies the IFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the days past due. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. These adjusted loss rates in the current year are similar to the effective loss rates observed in the prior year. The Group has identified the GDP, unemployment rate, inflation rate and interest rate of the countries in which it sells its goods and services to be the most relevant factors and accordingly adjusted the historical loss rates based on expected changes in these factors.

Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure as far as possible that it will always have enough liquidity to meet its liabilities when due under both normal and stressed conditions without incurring unacceptable losses or risking damage to the Company's reputation.

The Company uses activity-based costing to cost its products and services which assists it in monitoring cash flow requirements and optimizing its cash return on investments. Typically, the company ensures that it has sufficient cash on demand to meet expected operational expenses for a year of 60 days including the servicing of financial obligations; this excludes the potential impact of extreme circumstances that cannot reasonably be predicted such as natural disasters. In addition, the Company maintains the following lines of credit.

Banks - credit facilities in a principal amount of L.E 5 737 536 699 on which the interest is charged at a variable interest rate for facilities in Egyptian pound. Interest on loans and credit facilities denominated in U.S Dollars and Egyptian Pounds shall be payable at a variable interest rate.

Liquidity risks

The liabilities due to the Company's suppliers and bank at reporting date of the separate statement of financial position are as follows:

30/06/2026

	Total book value	Contractual cash flows	6-12 months	1-5 years
Trade payables	2 886 433 593	2 886 433 593	2 886 433 593	-
Loans	1 671 438 098	2 162 838 542	185 113 574	1 977 724 968

Lease liabilities	133 574 428	276 758 828	79 707 739	197 051 089

Market risk

Market risk is the risk that changes in market prices such as foreign exchange rates interest rates and equity prices will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters while optimising the return.

The Company incurs financial liabilities in order to manage market risks. All such transactions are carried out within the guidelines set by the management.

Currency risk

The Company is exposed to currency risk on sales purchases and borrowings that are denominated in a currency other than the respective functional currencies of the Company primarily the L.E The currencies in which these transactions primarily are denominated are Euro USD and Swiss Francs (CHF).

In respect of other monetary assets and liabilities denominated in foreign currencies the Company's policy is to ensure that its net exposure is kept to an acceptable level by buying or selling foreign currencies at spot rates when necessary to address short-term imbalances.

Foreign currency risk

Exposure to currency risk

The company's exposure to foreign currency risk was as follows based on notional amounts:

	USD	Euro
Trade and other receivables	38 808 703	5 691 832
Cash and cash equivalents	14 524 806	1 059 775
Creditors and other credit balances	(71 641 001)	(11 775 006)
30 June 2026 Surplus (Deficit)	(18 307 492)	(5 023 399)
31 December 2025 (Deficit)	(5 763 839)	(3 278 050)

The following significant exchange rates applied during the year:

	Average rate		Closing Rate	
	2026	2025	2026	2025
USD	50.95	50.53	49.3	47.74
Euro	59.46	55.14	56.21	56.09

Sensitivity analysis

The decrease of the Egyptian pound, as illustrated above, against the following currencies—USD and EUR—as of 30 June 2026, may lead to a decrease in shareholders' equity and profit or loss, based on the amounts presented below. This analysis is based on exchange rate fluctuations that the company considers reasonably possible as of the date of the separate interim financial position. The analysis assumes that all other variables, particularly interest rates, remain constant and disregards the impact of forecasted revenues and expenses.

	30 June 2026
EGP	10% Effect
USD	(90 255 936)
Euro	(28 236 526)

Interest rate risk

The Company adopts a policy of ensuring that its exposure to changes in interest rates on borrowings is on a fixed-rate basis considering assets with exposure to changes in interest rates.

A reasonable possible change of 1% in interest rates at the reporting date could increase (decrease) equity and profit or loss by the amounts described below. This analysis assumes that all other variables particularly foreign exchange rates remain constant.

	Profit or Loss	
	1% increase	1% decrease
30 June 2026 (Variable Interest Rate)	7 408 975	(7 408 975)
31 December 2025 (Variable Interest Rate)	6 490 832	(6 490 832)

Capital management

The Board's policy is to maintain a strong capital base so as to maintain investor creditor and market confidence and to sustain future development of the business. Capital consists of paid-up capital and retained earnings and reserves.

	2026	2025
	<u>L.E</u>	<u>L.E</u>
Total liabilities	11 565 794 423	8 835 550 688
Less: cash and cash equivalent	(779 410 800)	(705 820 715)
Net debt	10 786 383 623	8 129 729 973
Total equity	7 438 353 500	6 946 559 912
Net debt to equity ratio	145%	%117

There were no changes in the company's approach to capital management during the period.

30- Lease contracts.

30-1 Liabilities arising from lease contracts:

- Operating Lease contracts liabilities

- The Company leases buildings and warehouses, with each lease agreement being contracted individually and subject to its own specific terms. The lease terms range from 1.5 years to 10 years, and some contracts include options to extend the lease, providing the Company with flexibility. The implicit interest rate is approximately 14%.
- The Company entered into an agreement with Taiba for Trading and Distribution (S.A.E) – a 99.9% owned subsidiary – to lease the administrative building to the subsidiary in return for a quarterly rental amounting to a total of EGP 1 320 000 during the financial period ended 30 June 2026 (EGP 1 320 000 as of 30 June 2025).
- As well as signing another operating lease contract on October 1,2025 for 18 juice dispensers, starting from October 1,2025, at a value of EUR 18,219 Per month for a period of 8 years, with an annual increase of 1% of the rental value.
- The Company incurred interest expenses on lease liabilities amounting to EGP 9 939 507 during the financial period ended 30 June 2026.

	<u>L.E</u>
Goodwill in the Egyptian Company for Dairy Products	79 423 934
Goodwill in Al Marwa Food Industries Company	50 658 956
Total Goodwill	130 082 890
Subsequent Impairment of Goodwill in the Egyptian Company for Dairy Products	(33 000 000)
	<u>97 082 890</u>

(b) Increase in the Value of Fixed Assets in Al Marwa Food Industries Company

It was allocated as follows:

	<u>L.E</u>
Machinery and Equipment	30 241 732
Buildings, Constructions, and Utilities	7 631 100
Land	2 382 082
Tools and Instruments	907 092
Vehicles and Transportation Means	11 084
Total	41 173 090
Accumulated Depreciation of These Amounts as of the Merger Date	(38 791 008)
Net Amount (Representing Land Value Only)	<u>2 382 082</u>

Impairment of Goodwill

Goodwill is tested for impairment annually, or more frequently if there are indications of impairment. For cash-generating units (CGUs) to which goodwill has been allocated because of a business combination, the impairment test is performed by comparing the carrying amount of each CGU with its recoverable amount. The recoverable amount is determined based on the value in use calculation using cash flow projections derived from financial forecasts approved by senior management, covering a five-year period. A pre-tax discount rate is applied to the projected cashflows of the relevant CGUs, ranging from 20.9% to 26.3%.

For the terminal value, the Gordon growth model is applied to the cashflows of the final year of the forecast period, using a long-term growth rate of 3%. The value in use is most sensitive to changes in the assumptions relating to the pre-tax discount rate.

Management has determined the values assigned to each of the key assumptions based on the following:

(a) Sales growth assumption

Sales growth rate, representing the average annual growth rate over the expected five-year period, based on past performance and managements expectations for market development.

(b) Pre-tax Discount Rate

Pre-tax discount rate A discount rate, namely weighted average cost of capital (WACC), is applied for specific business areas based on assumptions regarding interest rates, tax rates and risk premiums and is recalculated to a before-tax rate ('Pre-tax discount rate').

The assumptions used in the value in use calculations, for which the recoverable amount is most sensitive, are follows:

Sensitivity to changes in assumptions – Egyptian Company for Dairy Products

The following assumptions are most sensitive to changes in key assumptions:

(a) Sales growth assumption

Sales growth during the forecast period has been estimated at a compound annual growth rate (CAGR) of 8%, assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the pre-tax discount rate.

(b) Pre-tax Discount Rate

The pre-tax discount rate during the forecast period has been estimated at 20.9%. Assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the pre-tax discount rate.

Sensitivity to changes in Assumptions- Al Marwa Food Industries Company

The following assumptions are the most sensitive to changes in the key assumptions:

(c) Sales Growth Assumption

Sales growth during the forecast period has been estimated at a compound annual growth rate (CAGR) of 3%. Assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the compound annual growth rate.

(d) Pre-tax Discount Rate

The pre-tax discount rate during the forecast period has been estimated at 26.3%. Assuming all other assumptions remain constant, the value in use is not significantly affected by reasonably possible changes in the pre-tax discount rate.

39- Merger

The Extraordinary General Assembly of the Company, convened on 26 December 2024, approved the report of the committee formed by the decision of the Minister of Investment and International Cooperation No. 95 of 2018, issued under registration No. 1290 dated 10 November 2024 by the Economic Performance Sector of the General Authority for Investment and Free Zones, for the purpose of evaluating the net equity of both the merging company (Juhayna Food Industries Company) and the merged companies (International Company for Modern Food Industries, Egyptian Company for Dairy Products, Egyptian Company for Food Industries – Egyfood, and Al Marwa Company for Food Industries) at book value based on the financial statements of these companies as of 31 December 2023. This was recorded in the commercial register of the Company on 27 February 2025. Accordingly, the balances of the merged companies listed below were merged into the merging company on the same date.

The consolidated financial data of the merged companies as of the commercial registration date, 27 Feb 2025
