

Mr. / Head of Disclosure Sector in the Egyptian Stock Exchange

After Greetings,

Referring to the separate financial results of Lecico Egypt S.A.E. for the financial period ended March 2026, the company reported a net profit of LE 72,463,133 compared to a net profit in the last year of LE 42,867,406. The reason for the profit increase in the financial period ended March 2026 is due to an increase in profits resulting from exchange rate differences by an amount of EGP 32 million compared to the previous year.

Best Regards,

Lecico Egypt  
Mohamed Aly Mohamed Hassan  
Finance Director  
Investor Relations Officer

### Independent Auditors' Report on Review of Separate Interim Financial Statements

#### To the members of the Board of Directors of Lecico Egypt Company (S.A.E)

##### *Introduction*

We have reviewed the accompanying separate interim financial statements of Lecico Egypt (S.A.E.) "the Company" as of March 31, 2026, which comprises:

- The Separate statement of financial position as of March 31, 2026.
- The Separate statements of profit or loss for the three-month period ended March 31, 2026.
- The Separate statement of comprehensive income for the three-month period ended March 31, 2026.
- The Separate statement of changes in equity for the three-month period ended March 31, 2026.
- The Separate statement of cash flows for the three-month period ended March 31, 2026.
- Notes to the interim financial statements, comprising material accounting policies and other explanatory information.

Management is responsible for the preparation and fair presentation of these separate interim financial statements in accordance with Egyptian Accounting Standards including the requirements of EAS 30 "Interim Financial Reporting". Our responsibility is to express a conclusion on these separate interim financial statements based on our review

##### *Scope of Review*

Except for what will be discussed in the Basis of Qualified Conclusion paragraph, we conducted our review in accordance with the Egyptian Standard on Review Engagements 2410, "Review of Interim Financial Statements Performed by the Independent Auditor of the Entity". A review of interim financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these separate interim financial statements.

### ***Basis for Qualified Conclusion***

According to indicators described in detail in notes (15) and (30-1) to the separate interim financial statements, the Company's investment in Lebanese Ceramic Industries company (a subsidiary company) amounting to approximately EGP 71.3 million as of March 31, 2026 representing %1.2 of the Company's total assets, and balance due from the subsidiary company amounting to EGP 176 million as of March 31, 2026 representing %3 of the Company's total assets. The Company did not prepare impairment study for investment and its balance due from subsidiary company. Consequently, we were not able to obtain assurance on the valuation of these balances as of March 31, 2026.

On February 28, 2026, we issued our audit report with a qualified opinion on the company's financial statements for the financial year ended December 31, 2025, for the same reason mentioned above.

### ***Qualified Conclusion***

Based on our review, except for the possible effects of such adjustments, if any, as might have been determined to be necessary if we have obtained with what is described in the Basis of Qualified Conclusion above, nothing has come to our attention that causes us to believe that the accompanying March 31, 2026, separate interim financial statements do not present fairly -in all material respects- the financial position, financial performance and cash flows in accordance with the Egyptian Accounting Standards including the requirements of EAS 30 "Interim Financial Reporting".

### ***Emphasis of matter***

Without considering the following as an additional qualification on our conclusion mentioned above, as detailed in Note (33) of the notes to the separate interim financial statements, the Board of Directors of Lecico Egypt (the holding company) held a meeting on September 17, 2024, and approved the decision of the committee formed by the General Authority for Investment and Free Zones, which was approved on July 24, 2024. This decision grants permission for the merger of Lecico Egypt (an Egyptian Joint Stock Company) (the merging company) with Lecico Ceramic Industries (Egyptian Joint Stock Company) (merged company), International Ceramics Company (Egyptian Joint Stock Company) (merged company) and European Ceramics Company (Egyptian Joint Stock Company) (merged company). The merger will be based on the book values according to the financial statements of the merging company and the merged companies as of December 31, 2022, which were taken as the basis for the merger. On October 29, 2024, the Financial Regulatory Authority (FRA) approved the publication of the disclosure report, On June 17, 2025, Extraordinary General Meeting (EGM) for Lecico Egypt (the merging company) approved the merger decision, On June 23, 2025 the extraordinary general meeting of the merged companies approved the decision of merge and this was recorded in the Commercial Register on 31 March 2026.

**2. The basis for preparing the separate interim Financial Statements.**

**a. Compliance with accounting standards and laws**

- The separate interim financial statements have been prepared in accordance with the Egyptian accounting standards and the relevant Egyptian laws and regulations.
- Egyptian accounting standards require referring to international financial standards for events and transactions that are not covered by an issued accounting standard or legal requirements that clarify how to treat them.
- The Company's standalone financial statements were approved by the Board of Directors on 24 May ,2026.
- Details of the Company's Material accounting policies are included in Note (32).

**b. Functional and presentation currency**

- The separate interim financial statements are presented in Egyptian Pounds (EGP) which is the company's functional currency unless otherwise indicated in the interim financial statements or the accompanying notes.

**c. Basis of measurement**

The interim financial statements have been prepared on historical cost basis except for the following:

- Financial assets and liabilities recognized at fair value through profits or losses.
- Financial assets and liabilities recognized at fair value through other comprehensive income.
- Financial assets and liabilities recognised at amortized cost.

For presentation purposes, the current and non-current classification was applied in the separate statement of financial position, Expenses in the separate statement of profit or loss were analyzed by function, and the separate statement of cash flows was prepared using the indirect method.

**d. Use of Estimates and Judgments**

In preparing the separate interim financial statements in accordance with Egyptian Accounting Standards (EAS), management has made judgments, estimates and assumptions that affect the application of the Company's accounting policies and the reported amounts of assets, liabilities, income and expenses and the accompanying disclosures, and the disclosure of contingent liabilities. These estimates and assumptions are based on experience and various factors. Actual results may differ from these estimates and the uncertainty about these assumptions and estimates could result in outcomes that require a material adjustment to the carrying amount of assets or liabilities affected in future years.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised if the revision affects only that year or in the year of the revision and future years if the revision affects both current and future years.

**e. Judgments**

Information about judgements made in applying accounting policies that have the most significant effects on the amounts recognized in the separate financial statements is included in the following notes:

- **Revenue recognition**

Revenue is recognized as detailed in the accounting policies applied.

- **Equity-accounted investees and associates Companies:**

Determining whether the Company has significant influence over Companies and investees or joint control. Management reviews its assumptions and prudent assessments, including those used in judging the extent to which the firm has absolute or joint control or significant influence over its investee companies, whenever a significant event or significant change occurs to the terms of its contractual agreements.

- **Lease contracts classification.**

In the process of classifying properties, management has made various judgements. Judgement is needed to determine whether a property qualifies as an investment property, property, plant and equipment and/or property held for sale. The Company develops criteria in order to exercise that judgement consistently in accordance with the definitions of investment property, property, plant and equipment and property held for sale. In making its judgement, management considered the detailed criteria and related guidance for the classification of properties as set out in EAS 2, EAS 49, and EAS 10, and the intended usage of property as determined by management.

- **Incremental Borrowing Rates (IBRs) applied in right of use calculation.**

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate. The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of asset leased.

The company cannot easily determine the implicit interest rate in the lease contract, and therefore it uses the incremental borrowing rate to measure the lease liabilities. The incremental borrowing rate is the interest rate that the company must pay in order to borrow the necessary financing over a similar term and with a similar guarantee to obtain an asset of the same value as the "right of use" asset in a similar economic environment. Therefore, the incremental borrowing rate reflects what the company has to pay, which requires an estimate when published rates are not available or when they need to be adjusted to reflect the terms and conditions of the lease.

- **Recognition of current and deferred tax assets and liabilities and their measurement**

Income taxes, whether current or deferred, are determined the Company in accordance with the tax law requirements.

The Company's profit is subject to income tax, which requires the use of significant estimates to determine the total income tax liability. As determining the final tax liability for some transactions could be difficult during the year, the Company record current tax liability according to its' best estimate about the taxable treatment of that transactions and

the possibility of incurring of additional tax charges that may result from the tax inspection. And when a difference arises between the final tax liability and what is being recorded, such difference is recorded as income tax expense and current tax liability in the current year and to be considered as change in accounting estimates.

For recognition of deferred tax assets, management uses assumptions about the availability of sufficient taxable profits allowing use of recognized tax assets in the future. Management also uses assumptions related to determination of the applicable tax rate at the financial statements date at which deferred tax assets and liabilities are expected to be settled in the future.

This process requires the use of multiple and complex estimates in estimating and determining the taxable pool and temporary deductible taxable differences resulting from the difference between the accounting basis and the tax basis for some assets and liabilities. In addition to estimating the extent to use deferred tax assets arising from carry forward tax losses, in the light of making estimates of future taxable profits and future plans for each of the activities.

f. **Assumptions and estimation uncertainties**

The key assumptions concerning the future, and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are discussed below. The Company bases its assumptions and estimates on parameters available when the separate financial statements were prepared. Existing circumstances and assumptions about future developments, however, may change due to market changes or circumstances arising that are beyond the control of the Company.

Such changes are reflected in the assumptions when they occur.

- **Measurement of expected credit loss**

The Company assesses the impairment of its financial assets based on the expected credit loss ("ECL") model. Under the ECL model, the Company accounts for expected credit losses and changes in those expected credit losses at the end of each reporting year to reflect changes in credit risk since initial recognition of the financial assets. The Company measures the loss allowance at an amount equal to the lifetime ECL for its financial instruments. When measuring ECL, the Company uses reasonable and supportable forward-looking information, which is based on assumptions for the future movement of different economic drivers and how these drivers will affect each other. Loss given default is an estimate of the loss arising on default. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, considering cash flows from collateral and integral credit enhancements. Probability of default constitutes a key input in measuring ECL. Probability of default is an estimate of the likelihood of default over a given time horizon, the calculation of which includes historical data, assumptions, and expectations of future conditions.

**Impairment of non-financial assets**

On the date of preparing the separate financial statements, the company evaluates the asset if there is an indication that the asset is impaired. If there is an indication of that, the company evaluates the recoverable amount of the asset. The recoverable amount of the asset is the fair value of the asset less selling costs or its value in use. Whichever is higher, when assessing the

value in use, the estimated future cash flows of the asset are discounted to their present value using a discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

When determining the fair value less costs to sell, recent market transactions are taken into account. If the recoverable amount of an asset is estimated to be less than its carrying amount, the separate carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognized directly in the standalone profit or loss statement.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but only to the extent that the carrying amount does not exceed the carrying amount that would have been determined had no impairment loss existed for the carrying amount of asset in prior years, A reversal of an impairment loss is recognized immediately in the standalone statement of profit or loss.

- **The useful life of fixed assets and intangible assets**

The company's management determines the estimated useful life of fixed assets and intangible assets for the purpose of calculating depreciation and amortization, this estimate is made after taking into account the expected use of the asset or actual obsolescence, the management yearly reviews the useful lives on an annual basis, at least, and the depreciation method to ensure that the method and years of depreciation are consistent with the expected pattern of economic benefits of the assets.

- **Impairment of property, plant and equipment and projects under construction**

Properties classified under property, plant and equipment and projects under construction are assessed for impairment when there is an indication that those assets have suffered an impairment loss. An impairment review is carried out to determine the recoverable amount which considers the fair value of the property under consideration.

- **Estimation of net realizable value for inventory**

Inventory is stated at the lower of cost or net realizable value ("NRV"). NRV is assessed with reference to sales prices at the end of the reporting year. NRV is determined by the Company having taken suitable external advice and in the light of recent market transactions, where available.

- **Provisions and contingent liabilities**

Management assess events and circumstances that might led to a commitment on the Company's side from performing its normal economic activities, management uses in this primary estimates and assumptions to judge the extend on which the provision's recognition conditions have been met at the financial statement date, and analyze information to assume whether past events lead to current liability against the Company and estimate the future cash outflows and timing to settle this obligation, in addition, selecting the method which enable the management to measure the value of the commitment reliably.

**g. Fair value measurement**

A certain number of the Company's accounting policies and disclosures require measurement of fair values, for both financial and non-financial assets and liabilities.

Accreditation is measured in the fair value of assets and liabilities mainly on available market data, and the data that is relied upon in the evaluation is classified according to the following hierarchy:

- **Level 1:** quoted prices (unadjusted) in active markets for identical assets or liabilities.
  - **Level 2:** inputs of the quoted prices included in level (1) that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
  - **Level 3:** inputs for the asset or liability that are not based on observable market data (unobservable inputs).
- The Company recognizes transfers between levels of the fair value hierarchy at the end of the financial year during which the change has occurred.
- Further information about the assumptions made in measuring fair values is included in the following :
- Investment with fair value through profit or loss.
  - Financial instruments (Note No. 25)

**h. The consolidated interim Financial Statements**

The Company has subsidiaries and according to the Egyptian Accounting Standards No. (42) "consolidated financial statements" and Article 188 of the executive regulations for Companies' law No. 159 of 1981, the Company is preparing consolidated financial statements for the Group which should be used as a reference to understand the financial position, financial performance and cash flows for the group as a whole.

on June 17, 2025, the Extraordinary General Assembly of Lecico Egypt (an Egyptian joint-stock company) as the merging company approved the merger of both Lecico Ceramics Industries S.A.E (Merged Company), International Ceramic S.A.E (Merged Company) and European Ceramic Company S.A.E (Merged Company) into Lecico Egypt S.A.E and the merger was duly recorded in the Commercial Register on March 31, 2026.

شركة ليسيكو مصر  
ش.م.م.

- 1- The management of Lecico Egypt assessed the need to form an impairment in the value of investments on March 31, 2026, so it prepared a study for the impairment in the value of the investment in Lecico (UK) Ltd (a subsidiary) amounting to EGP 303 million based on the expected future plan for Lecico (UK) Ltd (a subsidiary) in which it adopts achieving profits and positive results which will reflect positively on the operational and financial indicators in the coming years for the subsidiaries.

The following table illustrates the methods used to assess the fair value of an investment :

| Company           | Method                          | Important inputs that cannot be observed |
|-------------------|---------------------------------|------------------------------------------|
| Lecico limited UK | Discounted cash flows to equity | Growth Rate 4.4%<br>Discount Rate 10%    |

The company assesses annually whether there is a need to recognize an impairment in the value of the investment.

- 2- The group's management decided to make a comprehensive restructuring plan for Lecico Lebanon (one of the group's subsidiaries) during 2019, in light of the negative results and flows achieved by the aforementioned company during the previous years. The restructuring plan for the subsidiary company includes restructuring its financial and operational aspects, making a fundamental change in production, as well as a comprehensive examination of the company's assets and its current value. At the present time, it is not possible to estimate the impact of the final outcome of the subsidiary company's restructuring plan after the recent events that the State of Lebanon is going through, as Lebanon is facing unstable political conditions due to the ongoing war, which had a great impact on its economy and the banking sector, which led to a decline in economic activity in general during the period, that may have a fundamental impact to evaluate the company's assets and liabilities resulting from its future activities.

- Provisions represent the value of claims for obligations that are not specified in timing or amount in relation to the company's activities. The management reviews these provisions annually and adjusts the amount of the provision according to the latest update, discussions and agreements with those parties. The formed provisions are charged to the standalone statement of profit or loss
- The Company did not disclose all of the information required in accordance with revised Egyptian Accounting Standard as the management assumes that the disclosure of such information would seriously affect the final settlement of those potential claims.

**24- Long Term Notes Payable**

The long term notes payable represent the present value of the notes payable issued in favor of vendors of company, with due dates more than one period from the reporting date, discounted at average effective interest rate of the company 20.11 %.

**25- Objectives and policies for risk management of financial instruments**

This note presents information on the Company's financial instruments, including:

- An overview of all financial instruments held by the company.
- Specific information on each type of financial instrument.
- Information about determining the fair value of the instruments, including judgments and

estimation uncertainties.

The Company's main financial instruments include term deposits and financial investments

in financial assets at fair value through profit or loss. The main purpose of these financial instruments is to raise financing for the company's operations. The Company has many other

financial instruments such as customers and suppliers which arise directly from operations.

The main risks arising from the Company's operations are foreign exchange risk and credit risk.

### **Financial Assets**

All financial assets owned by a company are measured at amortized cost using the effective interest rate method and as a result book values are a reasonable approximation of fair value, except for financial investments measured at fair value.

### **Financial liabilities**

All financial liabilities owned by the company are measured at amortized cost using the effective interest rate method and as a result the book amounts are a reasonable approximation of fair value.

The company has the following financial instruments:

|                                          |           | March 31,<br><u>2026</u><br><u>EGP</u> | December 31,<br><u>2025</u><br><u>EGP</u> |

| <b><u>Financial liabilities</u></b>      |           |                                        |                                           |
| Banks credit facilities                  | (21)      | 1 700 983 016                          | 715 326 477                               |
| Trade , Notes and other payables         | (24),(22) | 1 498 473 179                          | 610 268 112                               |
| Due to related parties                   | (30-2)    | 39 652 946                             | 741 278 197                               |
|                                          |           | <u>3 239 109 141</u>                   | <u>2 066 872 786</u>                      |

All financial assets and liabilities have been classified and measured at amortized cost, and the fair value of all financial instruments does not differ materially from their book value, except for financial assets that are measured at fair value.

For the purpose of disclosure of financial instruments, non-financial assets amounting to EGP 202,052,683 March 31,2026 (December 31 2025: EGP 98,607,585) have been excluded from other debit balances it was also excluded non-financial liabilities amount EGP 6,705,596 (December 31, 2025: EGP 7,779,616) have been excluded from other credit balances.

## **25-1 Financial Risk Management**

Company is exposed to the following risks from its use of financial instruments:

- Credit risk
- Liquidity risk
- Market risk
- Currency risk
- Interest rate risk

## F. Other market price risk

This note presents information about the Company's exposure to each of the above risks, the Company's objectives, policies and processes for measuring and managing risk, as well as the Company management of capital. Further quantitative disclosures are included throughout these separate financial statements.

The Board of Directors of the Parent Company has overall responsibility for the establishment and oversight of the Company's risk management framework. The Board also identifies and analyzes the risks faced by the Company, sets appropriate risk limits and controls, and monitors risks and adherence to limits.

The Company aims to develop a disciplined and constructive control environment through which all employees understand their roles and obligations.

A- **Credit Risk**

The Company is exposed to credit risk as a result of the counterparty's failure to fulfill its contractual obligations when due, in respect of the following:

- Trade receivables
- Debtors and other debit balances
- Due from related parties
- Employees' accruals
- Cash in banks and on hand

Credit risk is the risk that a company will suffer financial loss as a result of the failure of the client or counterparty of a financial instrument to fulfill its contractual obligations, arising mainly from customers. The book value of financial assets represents the maximum credit risk.

The company's exposure to credit risk is mainly influenced by the individual characteristics of each client. However, management also takes into account factors that may affect the credit risk of its customer base, including the risk of default associated with the industry and the sector in which customers operate.

For clients, the company has established a credit policy according to which each new client is individually analyzed according to solvency before submitting the entity's standard payment and delivery terms and conditions, and includes a review of financial statements, information about the business and in some cases bank references. Each customer is assigned a credit limit and reviewed periodically.

When monitoring customer credit risk, clients are grouped according to their credit characteristics, history of dealing with the company and the presence of previous financial difficulties.

B- **Liquidity risk**

Liquidity risk is the risk that the company will not fulfill its obligations according to the contractual term with third parties. The Company's approach to liquidity management is to ensure - whenever possible - that it has sufficient liquidity to meet its obligations on their maturity date in normal and critical circumstances without incurring unacceptable losses or damaging the Company's reputation.

The ultimate responsibility for liquidity risk management lies with senior management who have developed an appropriate liquidity risk management framework to manage the Company's short, medium and long-term funding and manage liquidity requirements.

The Company manages liquidity risk by maintaining adequate reserves, banking facilities, and standby borrowing facilities, by continuously monitoring expected and actual cash flows, and by matching asset maturity dates and financial obligations.

Management forecasts cash flows and monitors successive forecasts of the Company's liquidity requirements to ensure that it has sufficient cash to meet its operational needs while always maintaining sufficient amount of committed and undrawn credit facilities so that the Company does not violate borrowing limits or undertakings (if any) on any of its borrowing facilities. This forecast considers the company's debt financing plans and compliance with internal rate targets.

**C- Market Risk**

Market risk is the risk that changes in market prices, such as foreign exchange rates, interest rates and equity prices will affect the Company's income and expenses or the value of its holdings of financial instruments.

The objective of market risk management is to manage and control market risk exposure within acceptable parameters, while optimizing the return.

**D- Foreign currency risk**

Foreign currency risk is the risk that the value of a financial instrument will fluctuate due to a change in the foreign exchange rates.

The Company is exposed to foreign currency risk on purchases from foreign suppliers and loans denominated in foreign currency. The currencies giving rise to this risk are primarily US Dollar, Euro, Sterling Pound and South African Rand.

The following table displays the impact of an acceptable possible change in the exchange rates of the US dollar, the euro, the British pound and the South African rand. With all other variables remaining constant, the impact on the company's profits before taxation is due to changes in the value of monetary assets and liabilities. Changes in the exchange rates of all other foreign currencies are considered immaterial.

**E- Interest rate risk**

The Company adopts a policy to limit the Company's exposure to interest risk, therefore the Company's management evaluates the available alternatives for finance and negotiates with banks to obtain the best available interest rates and credit conditions. Borrowing contracts are presented to the Board of Directors. The finance position and finance cost are periodically evaluated by the Company's management. The Company does not enter into hedging contracts for interest rates.

**F- Other market price risk**

- The company is exposed to risks associated with the pricing of goods from service providers.
- Selling prices exhibit limited volatility
- To manage price risks, the company constantly monitor supply and demand trends in the market to determine the optimal time to enter service agreements.
- The company's management continuously monitors the fluctuations in the prices of key services.

**Credit risk**

The carrying amount of financial assets represents the maximum exposure to credit risk as follows:

|                                         | <b>Note</b> | <b>March 31,</b>     | <b>December 31,</b>  |

**Sensitivity Analysis**

A reasonably possible strengthening (weakening) of 5% other currencies exchange rate against Egyptian pound As of March 31, 2026, would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

**Profit or Loss**

|                     | <u>Increase</u> | <u>Decrease</u> |
|---------------------|-----------------|-----------------|
| US Dollar           | 107 667         | (179 481)       |
| Euro                | 236 177         | (251 327)       |
| Sterling Pound      | 15 759          | (45 662)        |
| Rand (South Africa) | 289 674         | (167 261)       |

A reasonably possible strengthening (weakening) of 5% other currencies exchange rate against Egyptian pound as of December 31, 2025, would have affected the measurement of financial instruments denominated in a foreign currency and affected equity and profit or loss by the amounts shown below. This analysis assumes that all other variables, in particular interest rates, remain constant and ignores any impact of forecast sales and purchases.

**Interest rate risk**

At the date of separate financial statements, the interest rate profile of the Company's financial instruments was as follows: -

| <b><u>Financial instruments with fixed interest rate</u></b>    | <b>March 31,<br/>2026<br/>EGP</b> | <b>December 31,<br/>2025<br/>EGP</b> |
|-----------------------------------------------------------------|-----------------------------------|--------------------------------------|
| Financial assets – time deposit                                 | 36 285 316                        | 476 700                              |
| Financial liabilities -Notes payable                            | 207 125 742                       | 107 028 751                          |
| <b><u>Financial instruments with variable interest rate</u></b> | <b>March 31,<br/>2026<br/>EGP</b> | <b>December 31,<br/>2025<br/>EGP</b> |
| Monetary assets – bank current accounts                         | 344 414 918                       | 172 976 853                          |
| Monetary liabilities -credit facilities                         | 1 700 983 016                     | 715 326 477                          |

The Company does not account for any fixed rate financial assets and liabilities at fair value through profit or loss. The Company does not designate derivatives (interest rate swaps) as hedging instruments under a fair value hedge accounting model. Therefore, a change in interest rates at the separate financial statements date would not affect the separate statement of profit or loss.

On Thursday April 25, 2025 the Central Bank of Egypt decided in its meeting to decrease the overnight rates by 725 basis points , Accordingly, the overnight deposit and lending rates, as well as the Central Bank's main operation rate, were reduced to 20%, 21%, and 20.5% respectively. The credit and discount rate was also lowered by 725 basis points to reach 20.5%.

The Monetary Policy Committee of the Central Bank of Egypt, in its meeting held on February 12, 2026, decided to reduce basic interest rates by 100 basis points, bringing the overnight deposit and lending rates and the Central Bank's main currency rate to 19%, 20%, and 19.5%, respectively. It also decided to reduce the credit and discount rate by 100 basis points to 19.5%.

**Assessment of expected credit losses**

The Company customizes each credit risk exposure based on a variety of data that is identified as loss risk statements based on forecasting and expertly applying credit judgment. Credit risk scores are defined using qualitative and quantitative factors that indicate the risk of loss.

Exposure risk for each credit risk category is classified by sector according to industry classification and customer classification and the expected credit loss rate for each sector is calculated based on the status of late payment and actual credit loss experience. These rates are multiplied by gradient factors to reflect the differences between economic conditions during the period in which historical data was collected, current conditions, and the company's view of economic conditions over the expected lifespan of customer balances.

**Measurement of Expected Credit Losses for trade receivables**

The company assigns each exposure a credit risk rating based on the data identified to predict loss risks (including, but not limited to, external ratings and management accounts). A simplified approach has been used in measuring credit risk for customer and receivables items by categorizing customers into groups with similar characteristics, determining the historical period used to calculate the loss rate, which ranges from two to five years, and establishing the loss rate based on historical data while considering expected changes in macroeconomic indicators (such as growth rate, inflation rate, and unemployment rate). These rates are then multiplied by numerical factors to reflect the differences between

economic conditions during the years in which the historical data was collected and current conditions.

**The following table represents information about credit risk & credit loss for trade receivables and other debit balance :**

|                                          | 31/3/2026                 |                    |                   | 31/12/2025                |                    |                   |

#### **Fair Value of Financial Instruments**

- "Fair value" is the price that will be received for the sale of an asset or paid for the transfer of an obligation in a structured transaction between market participants on the date of measurement in the asset or, in its absence, in the most advantageous market that the Company has access on that date. The fair value of liabilities reflects the risk of non-performance.
- A number of accounting policies and disclosures require a company to measure the fair values of both financial and non-financial assets and liabilities.
- The company has consistent practices regarding the measurement of fair values. Management is fully responsible for overseeing all significant fair value measurements, including the third fair value level.
- Management regularly reviews significant unnoteworthy inputs and evaluation adjustments. If third party information is used, such as broker quotes or pricing services. To measure fair value, management evaluates evidence obtained from third parties to support the conclusion that these valuations meet the requirements of Egyptian Accounting Standards including the level in the fair value hierarchy at which these valuations should be classified.

- When measuring the fair value of an asset or liability, evaluators use market data that is as observable as possible. Fair values are classified into different levels in the fair value sequence based on the inputs used in valuation methods as follows:

**Level I:** Prices listed (unadjusted) in active markets for similar assets or liabilities

**Level II:** Inputs other than the prices listed are included in the first level and can be observed for the asset or liability either directly (e.g. prices) or indirectly (i.e. derived from prices)

**Level III:** Asset or liability inputs that are not based on observable market data (unobserved inputs)

If the inputs used to measure the fair value of an asset or liability fall at different levels of the fair value hierarchy, then the entire fair value measurement is classified at the same level of the fair value hierarchy as the lowest level of input as it is important for the entire measurement.

The Company recognizes transfers between levels of the fair value hierarchy at the end of the reporting period during which the change occurred.

nominal values minus any estimated credit adjustments to assets and liabilities with a maturity of less than one year are expected to approximate their fair value. The fair values of non-current financial obligations are considered to be close to their book values because they carry interest rates, which are based on market interest rates.

## 26- Share capital and reserves

### 26-1 Authorized capital

The authorized capital was determined to be EGP 500 million distributed to 100 million shares with par value of EGP 5 per share.

### 26-2 Issued and paid up capital

The issued capital was determined and to be EGP 400 million (four hundred million Egyptian pounds) divided to 80 million shares (eighty million shares) nominal share with par value of EGP 5 (five Egyptian pounds) per share fully paid.

On October 29, 2024, the Financial Regulatory Authority approved the merger of Lecico for Ceramic Industries (merged company), International Ceramic Company (merged company), and European Ceramic Company (merged company) into Lecico Egypt (the merging company). As a result, the company's capital was amended from EGP 400 million to EGP 200 million, distributed over 80,000,000 shares, with a nominal value of EGP 2.5 per share after amendment following the merger, while allocating EGP 22,797,330 to the reserves account of the merging company.

On June 17, 2025, the Extraordinary General Assembly of Lecico Egypt (the merging company) approved the merger resolution. On June 23, 2025, the Extraordinary General Assemblies of the merged companies approved the merger resolution, and the merger was duly recorded in the Commercial Register on March 31, 2026.

### The company's capital structure consists of:

| <u>Shareholder Name</u>                   | <u>%</u>     | <u>No. of Shares</u> |
|-------------------------------------------|--------------|----------------------|
| Intage Holding Limited and its related    | 50 %         | 40 037 486           |

| Others                                    | 30,1 %       | 24 047 456           |
| <b>Total</b>                              | <b>100 %</b> | <b>80 000 000</b>    |

- The holders of ordinary shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at meetings of the company. All shares rank equally with regards to the Company's residual assets. All rights relating to shares temporarily held by the company (treasury shares) if any are suspended until those shares are reissued.

**Capital management**

- The policy of the company's board of directors is to maintain a strong capital to maintain the confidence of investors, creditors and the market, as well as to meet future developments of the activity.

The company's board of directors monitors the return on capital, which the company determines as net profit for the year divided by total equity. The company's board of directors also monitors the level of dividends for shareholders.

There are no changes in the company's capital management strategy during the period.

The company is not subject to any external requirements imposed on its own capital.

**26-3 Reserves**

**\* Legal reserve**

According to the Companies Law and the Company's statutes the Company is required to set aside 5% of the annual net profit to form a legal reserve. The transfer to legal reserve ceases once the reserve reaches 20% of the issued share capital based on company's statutes. The reserve is undistributable; however, it can be used to increase the share capital or offset losses. If the company continuously set aside 5% of the issued share capital, the reserve falls below the defined level (20% of the issued share) .

Legal reserve has been increased with an amount of 7 589 583 EGP from the profit of year 2025 according to the decree of general assembly held on March 31, 2026.

An amount of EGP 50,915,481 representing the legal reserve balance as at 31 December 2024 was transferred to retained earnings.

**\*\* Share premium reserve**

The balance of share premium result from issuing shares and GDR from issuing the company at the Egyptian stock exchange and London stock exchange.

**\*\*\* Land revaluation surplus**

Land revaluation surplus is represented in the adjusted value of Khorshid & Abou-Quir land that was modified to reevaluate the book value of company's assets with its market value at the date of revaluation in the year 1997. The revaluation result was included in the revaluation surplus in the shareholders' equity. That surplus is undistributable or transferable to capital which was closed at retained earnings.

**27- Treasury shares**

On March 18, 2023 the senior management approve to purchase 3,200,000 shares of the company's shares at a price of EGP 7.934 per share through the capital market, which represents 4% of the company's capital issues and traded in stocks exchange market.

On November 11, 2023, the Board of Directors of Lecico Egypt decided to approve the distribution of all previously purchased treasury shares to the company's shareholders as free shares, and legal and administrative measures have been taken for that and excluded on January 12, 2024.

**28- Capital commitments**

There is capital commitments for the company as of March 31, 2026 amounted 87,344,000 EGP (December 31, 2025 amounted 35,752,500 EGP) to purchase inventory and PUC.

**29- Contingent liabilities**

|                                           | 31/3/2026<br>EGP   | 31/12/2025<br>EGP |

- The company is committed to providing the master file, the local file and the report at the country level for each of its commercial and financial transactions to modify the transactions in favor of Egyptian tax authority in accordance with the united tax revenue law no. 206 of 2020 and its amendments.

**32- Material Accounting Policies**

The accounting policies mentioned below have been applied to years presented in the separate financial Statements.

**32-1 Foreign currency translation****32-1-1 Foreign currency transactions**

- Transactions in foreign currencies are translated at the foreign exchange rate prevailing at the date of the transaction.
- Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at the exchange rate at preparing periodic financial statements.
- Assets and liabilities that are measured at fair value in a foreign currency are translated at the exchange rate when the fair value was determined.
- Non - monetary assets and liabilities that are measured based on historical cost in a foreign currency are translated at the exchange rate at the date of the transaction.
- Foreign currency differences are generally recognized in profit or loss, except, foreign currency differences arising from the translation of the following items are recognized in OCI:
  - Investment available for sale in equity instruments (except impairment, in which case foreign currency differences that have been recognized in OCI are reclassified to profit or loss).
  - A financial liability designated as a hedge of the net investment in a foreign operation to the extent that the hedge is effective.
  - Qualifying cash flow hedges to the extent that the hedges are effective.

**32-2 Revenue from contracts with Customers**

Revenue from contracts with customers is recognized by the company based on five step module as identified in EAS No. 48:

**Step 1:** Determine the contract (contracts) with customer: A contract is defined as an agreement between two or more parties that meets the rights and obligations based on specified standards which must be met for each contract.

**Step 2:** Determine the performance obligations in contract: Performance obligations is a consideration when the goods and services are delivered.

شركة ليسيكو مصر  
ش.م.م.

**Step 3:** Determine the transaction price: Transaction price is the compensation amount that the Company expects to recognize to receive for the transfer of goods or services to customer, except for the collected amounts on behalf of other parties.

**Step 4:** Allocation of the transaction price of the performance obligations in the contract: If the service concession arrangement contains more than one performance obligation, the Company will allocate the transaction price on each performance obligation by an amount that specifies an amount against the contract in which the Company expects to receive in exchange for each performance obligation satisfaction.

**Step 5:** Revenue recognition when the entity satisfies its performance obligations.

The Company satisfy the performance obligation and recognize revenue over time, if one of the following criteria is met:

- a) Company performance does not arise any asset that has an alternative use of the Company and the Company has an enforceable right to pay for completed performance until the date.
- b) The Company arise or improves a customer-controlled asset when the asset is arise or improved.
- c) The customer receives and consumes the benefits of Company performance at the same time as soon as the Company has performed.

For performance obligations, if one of the above conditions is met, revenue is recognized in the year in which the Company satisfies performance obligation.

When the Company satisfies performance obligation by delivering the goods and providing the services promised, it creates an asset based on payment for the contract performance obtained, when the amount of the contract received from customer exceeds the amount of the revenue recognized, resulting advance payments from the customer (contractual obligation)

Revenue is recognized to the extent that is potential for the flow of economic benefits to the Company, revenue and costs can be measured reliably, where appropriate.

The application of Egyptian Accounting Standard No. (48) requires management to use the following judgements: -

#### **Satisfaction of performance obligation**

- The Company should assess all contracts with customers to determine whether performance obligations are satisfied over a year or at a point of time in order to determine the appropriate method for revenue recognition. The Company estimated that, and based on the agreement with customers, the Company does not arise asset has alternative use to the Company and usually has an enforceable right to pay it for completed performance to the date.
- In these circumstances, the Company recognizes revenue over a year of time, and if that is not the case, revenue is recognized at a point of time for the sale of goods, and revenue is usually recognized at a point of time.

شركة ليسيكو مصر  
ش.م.م.

**Determine the transaction price.**

- The Company must determine the price of the transaction in its agreement with customers, using this judgement, the Company estimates the impact of any variable contract price on the contract due to discount, fines, any significant financing component in the contract, or any non-cash contract and transfer of control in contracts with customers.

**Control transfer in contracts with customers**

- If the Company determines the performance obligations satisfaction at a point of time, revenue is recognized when control of related contract' assets are transferred to the customer.

In addition, the application of Egyptian Accounting Standard (EAS) No. 48 has resulted in:

**Allocation of the transaction price of performance obligation in contracts with customers**

The Company selected to apply the input method to allocate the transaction price to performance obligations accordingly that revenue is recognized over a year of time, the Company considers the use of the input method, which requires recognition of revenue based on the Company's efforts to satisfy performance obligations, provides the best reference to the realized revenue. When applying the input method, the Company estimates efforts or inputs to satisfy a performance obligation. In addition to the cost of satisfying a contractual obligation with customers, these estimates include the time spent on service contracts.

**Other matters to be considered.****Variable consideration**

if the consideration pledged in a contract includes a variable amount, then the Company shall estimate the amount of the consideration in which it has a right in exchange for transferring the goods or services pledged to the customer, the Company estimates the transaction price on contracts with the variable consideration using the expected value or the most likely amount method. This method is applied consistently throughout the contract and for identical types of contracts.

**The significant funding component**

The Company shall adjust the amount for the contract pledged for the time value of the cash if the contract has a significant funding component.

**Revenue recognition****a. Product sales**

Management evaluated the impact of applying the standard by applying the model referred to above and concluded that the current basis for revenue recognition is still appropriate because the only performance obligation is to deliver the quantities sold to its customers , whether domestic or export at the company's warehouses or other specified locations in accordance with the agreements , since according to the agreements concluded with customers , the company transfers control over the quantities sold to customers according to the following :

Local sales : The date of authorization for the goods to leaves the company's gates.

Export Sales : according to shipping term.

The value of revenue is measured by fair value of consideration received or due to the facility. Revenue is realized when there is sufficient economic benefits that will flow to the facility ,and the value of this revenue can be measured accurately No revenue is recognized in the event that not certain that the consideration will be recovered for this or cost associated with it.

**b. Dividends Income**

Dividends income is recognized in the separated statement of profit or loss on the date the Company's right to receive payments is established.

**c. Gain on sale of investments**

The gain on sale of financial investments are recognized when ownership transfers to the buyer, based on the difference between the sale price and its carrying amount at the date of the sale.

**d. Export subsidy revenue**

Export subsidy revenue is recognized in the statement of profit or loss on cash basis. And is presented under other income.

**32-3 Employees benefits****32-3-1 Short term employee benefit**

Short term employee benefit are recognize as an expense when the related service is provided. The amount expected to be paid is recognize as a liability when the company has a legal or implicit obligation to pay this amount and the obligation can be changed to a reliable degree.

**32-3-2 Workers' pension system**

The company contributes to the governmental social insurance system for the benefit of its employees in accordance with the Social Insurance Law. Employees and employers under this law contribute to the system with a fixed percentage of wages. The company's commitment is limited to the value of its contribution, and the company's contributions are charged to the income statement according to the accrual basis.

**32-4 Finance income and finance costs**

The Company's finance income and finance costs include:

interest income;

interest expense;

Dividends;

Foreign exchange gain or loss on financial assets and liabilities

Net gain or Losses of hedging contracts for foreign exchange rates;

Interest income or expense is recognized using the effective interest method.

Dividends are recognized in the profit or loss statement at the date of declaration of these dividends.

**32-5 Income tax**

The current tax and the deferred tax are recognized as revenue or as an expense in the profits or losses of the year, except in cases where the tax arises from a process or event that is recognized - in the same year or in a different year - outside the profits or losses, whether in other comprehensive income or within equity. direct or business combination.

**32-5-1 Current income tax**

Current taxes for the current year and previous years that have not yet been paid are recognized as a liability, but if the taxes that have already been paid in the current year and previous years exceed the value due for these years, then this increase is recognized as an asset. The values of current tax liabilities (assets) for the current and prior years are measured at the value expected to be paid to (recovered from) the tax administration, using tax rates (and tax laws) that are in force or about to be issued at the end date of the financial year. Dividends are taxed as part of the current tax. Offsetting tax assets and liabilities is only made when certain conditions are met.

**32-5-2 Deferred tax**

Deferred tax is recognized for temporary differences between the accounting basis of assets and liabilities and the tax basis of those assets and liabilities. Deferred tax is recognized for all temporary differences expected to be taxable except for the following:

- First recognition of goodwill,
- Initial recognition of the asset or obligation of the process that:
  - (1) Not a compilation of works.
  - (2) does not affect the net accounting profit or tax profit (tax loss).
- Temporary differences associated with investments in subsidiaries, sister companies and shares in joint ventures to the extent that the timing of reversing these temporary differences can be controlled and it is likely that such differences will not be reversed in the foreseeable future.

A deferred tax asset arising from the carrying forward of tax losses, the right to unused tax deduction and temporary deductible differences are recognized when there is a strong possibility of future taxable profits from which that asset can be used. The future tax profit is determined by the company's future business plan. The position of unrecognized deferred tax assets is reassessed at the end of each fiscal period and deferred tax assets that have not previously been recognized are recognized to the extent that it is likely in the future that there will be a tax profit that allows the value of the deferred tax asset to be absorbed. Deferred tax is measured using the tax rates expected to be applied when temporary differences are realized, using tax rates in force or in the process of being issued.

When measuring deferred tax at the end of the financial period, the tax effects of the procedures followed by the company for recovery or payment of the book value of its assets and liabilities are taken into account.

Tax assets and liabilities are not cleared unless certain conditions are met.

**32-6 Inventories**

Inventories are measured at the lower of cost or net realisable value. The cost of inventories is based on the weighted average method. The cost also includes other expenses incurred by the company to bring the inventory to its location and its current condition.

The net realisable value is determined on the basis of the expected selling price under normal circumstances, minus the estimated costs required to complete the sale.

Any impairment in the value of the inventory caused by a decrease in the net realisable value of the inventory is recognized in its book value, as are all other inventory losses, as an expense in the year in which the decrease or loss occurs.

**32-7 Fixed assets and depreciation****32-7-1 Recognition and measurement**

Items of fixed assets are measured at cost less accumulated depreciation and any accumulated impairment losses.

If significant parts of an item of fixed assets have different useful lives, then they are accounted for as separate items (major components) of fixed assets.

Any gain or loss on disposal of an item of fixed assets is recognised in profit or loss.

**32-7-2 Subsequent expenditure**

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Company.

**32-7-3 Depreciation**

The depreciable value of a fixed asset – which is the cost of the asset – is depreciated according to the straight-line method over the estimated useful life of each type of fixed asset, and depreciation is charged to profits or losses. Land is not depreciated

The estimated useful lives of fixed assets for current and comparative periods are as follows:

| <u>Asset</u>                 | <u>Estimated useful lives<br/>(Years)</u> |
|------------------------------|-------------------------------------------|
| Buildings and constructions  | 20 - 40                                   |
| Machinery and equipment      | 3-10                                      |
| Vehicles                     | 5                                         |

The methods of useful lives and the estimated value of assets are reviewed on the date of the financial statements.

Improvements in leased assets are depreciated over the term of the contract or its useful life, whichever is less. The depreciation method and useful lives of fixed assets are reviewed at the end of each fiscal period, and modified if necessary.

Profit or loss arising from disposal of property, plant and equipment are determined by comparing the disposal proceeds with carrying amount of the assets and are recognized in the separate statement of profit and loss under other income and expenses.

**32-8 Intangible assets****The recognition and initial measurement**

of this item represent the cost of acquiring software expected to be used, either through sale or operation. It is recorded at cost less accumulated depreciation and impairment losses. Depreciation begins once the software is ready for use, based on an estimate made by the management, which is prepared according to expectations regarding the benefits from the sale or operation of the software. This study should be reviewed periodically to verify the future benefit of such software and its potential for sale or operation. Depreciation is calculated using the straight-line method if future benefits are confirmed. If there is no certainty regarding the future benefit of these expenses, depreciation is calculated over the remaining useful life of the asset.

The depreciation expense is recognized in the income statement as it is incurred and allocated to the operating costs benefiting from the software.

**The useful life of intangible assets:**

|                   |         |
|-------------------|---------|
| Computer Software | 5 years |
|-------------------|---------|

**32-9 Projects under construction**

All expenditures directly attributable to bringing the asset to a working condition for its intended use are recorded in projects under construction. Whenever the assets are completed and are ready for their intended use, it will be transferred to fixed assets caption. Projects under construction are recorded at cost and it is not depreciated unless it was transferred to fixed assets.

**32-10 Financial instruments****A- Financial assets****Recognition and initial measurement**

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at fair value through profit or loss, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

**Classification and subsequent measurement****Financial assets**

On initial recognition, a financial asset is classified as measured at: amortized cost; FAIR VALUE through other comprehensive income – debt investment; fair value through other comprehensive income – equity investment; or fair value through profit or loss.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at fair value through profit or loss:

- A debt investment is measured at fair value through other comprehensive income if it meets both of the following conditions and is not designated as at fair value through profit or loss:
  - It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
  - Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

All financial assets not classified as measured at amortized cost or fair value through other comprehensive income as described above are measured at fair value through profit or loss. This includes all derivative financial assets. On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be

measured at amortized cost or at fair value through other comprehensive income as at fair value through profit or loss if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

### **Financial assets**

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management; and
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

Transfers of financial assets to third parties in transactions that do not qualify for de-recognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at fair value through profit or loss.

### **Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest**

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument.

This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- Terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual per amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition.

#### **Financial assets – Subsequent measurement and gains and losses**

|                                                                            |                                                                                                                                                                                                                                                                                                                                                       |
|----------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Financial assets classified at fair value through profit or loss</b>    | Financial assets at fair value through profit or loss are measured at fair value. Changes in the fair value, including any interest or dividend income, are recognized in profit or loss.                                                                                                                                                             |
| <b>Financial assets at amortized cost</b>                                  | These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on de-recognition is recognized in profit or loss.                             |
| <b>Equity investments at fair value through other comprehensive income</b> | These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.                                                    |
| <b>Debt investments at fair value through other comprehensive income</b>   | These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On de-recognition, gains and losses accumulated in OCI are reclassified to profit or loss. |

#### **Financial Liabilities – Classification, Subsequent measurement and gains and losses**

Financial liabilities are classified as either measured at amortized cost or at fair value through profit or loss. A financial liability is classified at fair value through profit or loss if it is designated as held for trading, or if it is a derivative or designated as such upon initial recognition. Financial liabilities measured at fair value through profit or loss recognize gains

and losses, including any interest expenses, in the profit or loss statement. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expenses and foreign exchange gains or losses are recognized in profit or loss. Any gain or loss upon derecognition is also recognized in the profit or loss statement.

### **Derecognition from Books**

#### **Financial Assets**

A financial asset is derecognized by the company when the contractual right to receive cash flows from the financial asset has expired, or when it has transferred the contractual right to receive cash flows from the financial asset in a transaction that transfers substantially all the risks and rewards of ownership of the financial asset. Alternatively, if the company has not transferred or retained substantially all the risks and rewards of ownership of the financial asset and has not retained control, the asset is also derecognized.

The company may enter into transactions that involve transferring recognized assets in its statement of financial position, while retaining all or substantially all the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

#### **Financial Liabilities**

A financial liability is derecognized when it is extinguished, either through settlement, cancellation, or expiration of the term specified in the contract. The company also derecognizes a financial liability when its terms are modified, and the cash flows of the modified liabilities differ significantly; in this case, a new financial liability is recognized based on the modified terms at fair value.

Upon derecognition of a financial liability, the difference between the carrying amount settled and the consideration paid (including any non-cash assets transferred or liabilities incurred) is recognized in the profit or loss statement.

### **32-11 Share capital**

#### **32-11-1 Ordinary shares**

Incremental costs directly attributable to the issue of ordinary shares are recognised as a deduction from equity. Income tax relating to transaction costs of an equity transaction are accounted for in accordance with EAS 24 "Income tax".

#### **32-11-2 Repurchase of share capital (Treasury shares)**

When the shares of the issued capital are repurchased, the amount paid for the repurchase, which includes all direct costs related to the repurchase, is recognized as a reduction of equity. Shares repurchased are classified as treasury shares and are shown deducted from equity. When selling or re-issuing treasury shares, the amount collected is recognized as an increase in shareholders' equity, and the surplus or deficit resulting from the transaction is presented within the issuance premium.

### **32-12 Impairment**

#### **Non-derivative financial assets**

##### **Financial instruments and assets arising from the contract**

The Company recognizes expected credit loss for the following items:

- Financial assets that are measured at amortized cost.
- For investments in debt instruments that are measured at fair value through other comprehensive income.
- Assets arising from the contract.

The Company measures the loss at an amount equal to the lifetime ECL of the financial asset, except for the following, which are measured at an amount equal to the 12-month ECL:

Debt instruments that are determined to have low credit risk at the reporting date. Other debt instruments and bank balances in which credit risk (ie the risk of default over the expected life of the financial instrument) has not increased significantly since initial recognition.

Commercial customer losses and assets arising from contracts are always measured at an amount equal to their lifetime expected credit losses.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating expected credit losses, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analyses, based on the company's historical experience and known credit rating including forward-looking information.

The Company assumes that the credit risk of a financial asset has increased significantly if it has been past due for collection for a period of more than 30 days.

**The Company considers a financial asset to be in default when:**

- It is unlikely that the Borrower will pay its credit obligations to the Company in full, without recourse on the part of the Company to measures such as liquidation of the collateral (if any); or
- The financial asset according to the terms of payment and the nature of each customer sector separately and in light of the study of expected credit losses prepared by the company.

The Company considers debt instruments to have low credit risk when their credit risk rating is equal to the globally understood definition of "investment grade".

Lifetime expected credit losses are the expected credit losses that result from all possible failure events over the expected life of the financial instrument.

12-month expected credit losses are the portion of expected credit losses that result from default events that are possible within the 12-month period after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months).

The maximum period considered when estimating expected credit losses is the maximum contractual period over which the company is exposed to credit risk.

**Measure expected credit losses**

It is a probability-weighted estimate of credit losses. The present value of all cash shortfalls is measured (ie the difference between the cash flows due to the entity in accordance with the contract and the cash flows that the entity expects to receive).

Expected credit losses are discounted at the effective interest rate of the financial asset.

**Credit impaired financial assets**

At each reporting date, the company assesses whether financial assets carried at amortized cost and debt instruments measured at fair value through other comprehensive income are credit impaired. A financial asset is considered "credit-impaired" when one or more events occur that have a detrimental effect on the estimated future cash flows of the financial asset.

**Evidence indicating credit impairment of financial assets includes observable data:**

Significant financial difficulty for the lender or issuer.

a breach of contract such as defaulting on or being more than 120 days past due and a restructuring of a loan or advance by the Company on terms that the Company will not otherwise observe, and the Borrower is likely to enter bankruptcy or other financial reorganization; or the disappearance of an active market for a security because of financial difficulties.

**Display expected credit losses in the statement of financial position**

The loss allowance for financial assets that are measured at amortized cost is deducted from the total amount of the carrying amount of the assets.

For debt securities that are measured at fair value through other comprehensive income, the loss allowance is charged to profit or loss and recognized in other comprehensive income.

**Debt write-off**

The total gross book value of a financial asset is written off when the company has no reasonable expectations of recovering all or part of the financial asset. For individual clients, the Company has a policy of writing off the gross book value when the financial asset is more than two years due based on previous experience in recovering similar assets. For corporate clients, the Company makes an assessment on its own as to the timing and amount of write-offs based on whether there is a reasonable expectation of recovery. The Company does not expect any significant recovery from the amount written off. However, financial assets that have been written off may still be subject to compliance activities in order to comply with the Company's procedures for recovery of amounts owed.

**32-13 Non-Financial assets**

At each reporting date, the Company reviews the carrying amounts of its non-financial assets (other than inventories, bio logical assets, investment properties, and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment-if any.

For impairment testing, assets are grouped together into the smallest Company of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGUs. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

An impairment loss in respect of goodwill – if any- is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized in the previous years.

**32-14 Provisions**

Provisions are valued at the present value of expected future cash flows discounted at a before tax discount rate that reflects current market assessments of the time value of money and the risks specific to the liability. An increase in the carrying amount of a

provision resulting from the use of discounting to create a present value that reflects the passage of time is recognized as a borrowing cost

### 32-15 Cash and cash equivalents

Cash and cash equivalents include cash balances and time deposits. For the purposes of preparing the statement of cash flows, cash and cash equivalents are defined as cash balances in the fund, current accounts with banks, term deposits, and treasury bills, which do not exceed three months. Overdraft bank balance, which is paid upon request, is considered part from the company's management of cash

### 32-16 Dividends

The Company distributes not less than 10% of net profits, after deducting the statutory reserve support, as a share of profits to employees, provided that such amount does not exceed the total annual salaries of employees of the Company. This distribution is made in accordance with the rules proposed by the Board of Directors and approved by the General Assembly, in compliance with the provisions of Companies Law.

Employees' share of profits is recognized as profit distributions within the statement of changes in equity and is recognized as a liability during the financial year in which it was approved by the Company's shareholders.

### 32-17 Loans

Borrowings are initially recognized at fair value, net of transaction costs incurred. They are subsequently measured at amortized cost, with any difference between the proceeds (net of transaction costs) and recoverable value recognized in profit or loss over the life of the loans using the effective interest method.

### 32-18 Borrowing cost

Borrowing costs related to the acquisition ,construction or production of a qualifying asset , which require a long period of time to prepare it for use for its intended purposes or for sale, are capitalized as part of the cash of the asset . other borrowing costs are charged as an expense in the year in which they are incurred. Borrowing costs are represented by interest costs and other costs that the company spends to borrow money.

### 32-19 Investments in subsidiaries

Subsidiary companies are the entities in which the "Company" investor has the ability to control its financial and operating policies of the entity this ability exists by possessing half of the voting power or more in the related subsidiary.

Investments in subsidiaries are stated – when acquired – at its acquisition cost. If a decline in the recoverable amount exists for any investment below the carrying amount "Impairment", the carrying amount of the investment will be adjusted by the amount of such impairment and will be charged to the statement of profit or loss for each investment.

### 32-20 Basic share in profit or loss

The company offers basic share price for its common stock. Basic share per share is calculated by dividing the profit and loss related to the shareholders for their contribution to the company's ordinary shares by the weighted average number of ordinary shares outstanding during the period for which the interim financial statements are prepared.

### 32-21 Statement of cash flows

The statement of separate cash flows is prepared according to the indirect method.

**32-22 Lease contracts****1- Determine whether the arrangement contains a rental contract or not**

At the inception of the arrangement, the company determines whether the arrangement is or contains a lease.

At inception or on reassessment of an arrangement containing a lease, the Company separates the payments and other consideration required by the arrangement into those of the lease and those of other components on the basis of their relative fair values.

If the company concludes in a finance lease that it is not possible to reliably separate the payments, then the asset and liability are recognized at an amount equal to the fair value of the underlying asset; After that, the obligation is reduced when the payments are made, and the financing cost is recognized, calculated on the obligation, using the company's incremental borrowing rate.

**2- Leased assets**

Leases of property, plant and equipment that transfer substantially all the risks and rewards of ownership to the Company are classified as finance leases. Leased assets are initially measured at an amount equal to the lower of the fair value of the fair value and the present value of the minimum lease payments. After initial recognition, the assets are accounted for in accordance with the accounting policy applicable to that asset.

Assets held under other leases are classified as operating leases and are not recognized in the company's statement of financial position.

**3- Lease payments**

Payments made under operating leases are recognized in profit or loss on a straight-line basis over the lease term. Lease incentives received are recognized as an integral part of the total lease expense, over the term of the lease.

Minimum lease payments made under finance leases are apportioned between finance charges and reduction of outstanding obligations. Finance expenses are charged for each lease year to reach a constant periodic rate of interest on the remaining balance of the liability.

**33- The Merge**

The Board of Directors of Lecico Egypt (Holding Company), in its meeting held on September 17, 2024, resolved to approve the decision of the committee formed by the General Authority for Investment and Free Zones, approved on July 24, 2024, authorizing the merger of Lecico Egypt (Egyptian Joint Stock Company) (Acquiring Company) with Lecico Ceramics Industries (Egyptian Joint Stock Company) (Acquiring Company), International Ceramics Company (Egyptian Joint Stock Company) (Acquiring Company), and European Ceramics Company (Egyptian Joint Stock Company) (Acquiring Company). The merger will be based on the book values as per the financial statements of the acquiring and acquired companies as of December 31, 2022, which serve as the basis for the merger. On October 29, 2024, the Financial Regulatory Authority approved the publication of the disclosure report. On June 17, 2025, the Extraordinary General Assembly of Lecico Egypt (Egyptian Joint Stock Company) (Acquiring Company) approved the merger resolution. On June 23, 2025, the Extraordinary General Assembly of companies approved the merger. The merged companies were approved by the merger decision, and this was recorded in the Commercial Register on March 31, 2026.

| Accounting Interpretation No. (2) "Carbon Reduction Certificates" | <p>Carbon Credits Certificates: Are financial instruments subject to trading that represent units for reducing greenhouse gas emissions. Each unit represents one ton of equivalent carbon dioxide emissions, and are issued in favor of the reduction project developer (owner/non-owner), after approval and verification in accordance with internationally recognized standards and methodologies for reducing carbon emissions, carried out by verification and certification bodies, whether local or international, registered in the list prepared by the Financial Regulatory Authority "FRA" for this purpose.</p> <p>Companies can use Carbon Credits Certificates to meet voluntary emissions reduction targets to achieve carbon trading or other targets, which are traded on the Voluntary Carbon Market "VCM".</p>  | <p>As part of Lecico efforts toward protecting the environment and promoting sustainability, We are currently preparing our Carbon Footprint (CFP) report, Life Cycle Assessment (LCA) report, and Environmental, Social, and Governance (ESG) report.</p> <p>We have proactively undertaken this reporting even though it is not yet a legal requirement for our company, but we believe this is an important step in our journey towards sustainability and reducing our Carbon Border Adjustment Mechanism (CBAM) exposure.</p> <p>We are closely monitoring updates to UK and EU regulations.</p> <p>At present, the sanitaryware (ceramic) industry is not within the scope of CBAM. However, there may be consideration for CBAM application in the UK starting in</p> | The application starts on or after the first of January 2025, early adaption is allowed. |

|                                                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                    |                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
