**LIMITED REVIEW REPORT
ON THE INTERIM SEPARATE FINANCIAL STATEMENTS**

**TO THE BOARD OF DIRECTORS OF
MADINET MASR FOR HOUSING AND DEVELOPMENT - S.A.E.**

Introduction

We have carried out a limited review of the accompanying interim separate financial position of Madinet Masr for Housing and Development - S.A.E. as of 30 June 2026, and the related interim separate statements of income, other comprehensive income, changes in equity and cash flows for the six months then ended, and a summary of significant accounting policies and other explanatory notes. Management is responsible for the preparation and fair presentation of these interim separate financial statements in accordance with Egyptian Accounting Standards. Our responsibility is to express a conclusion on these interim separate financial statements based on our limited review.

Scope of the Limited Review

We conducted our limited review in accordance with Egyptian Standard on Limited Review Engagements No. 2410, "Limited Review of interim financial statements performed by the Independent Auditor of the Entity". A limited review of interim separate financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A limited review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently we are unable to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion on these interim separate financial statements.

Conclusion

Based on our limited review, nothing has come to our attention that causes us to believe that the accompanying interim separate financial statements do not present fairly in all material respects, the interim separate financial statements of Madinet Masr for Housing and Development - S.A.E. as of 30 June 2026, and its separate financial performance and its separate cash flows for the six months then ended in accordance with Egyptian Accounting Standards.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS

30 June 2026

1. COMPANY BACKGROUND

1.1 *Legal form of the company*

Madinet Masr for Housing and Development - S.A.E. was incorporated in accordance with the Presidential Decree No. 815/1959 then changed to Joint Stock Company according to Presidential Decree No 2908/1964 under the umbrella of the Public-Sector Authority for Housing by Presidential Decree No. 469/1983.

The company transferred to an Egyptian joint stock company under the provisions of Law No. 203 for 1991 issued on 19/06/1991 under the umbrella of the Holding Company for Housing under the name of Madinet Masr Housing and Development. The Extraordinary General Assembly of the company held on 30/6/1996 approved the change to the provisions of Law No. 159 for 1981 and its executive regulations and published in company's journal on January 1997 rather than the provisions of Law No. 203 for 1991.

The company was registered in the Commercial Register No. 300874 on 23 December 1996 under tax card No. 095-009-200.

On 2 May 2023, the Extraordinary General Assembly Meeting has approved the amendments of the company's name in Article (2) of the Articles of Association to become "Madinet Masr for Housing and Development Company", and the amendment has been registered in the company's commercial registry on 13 September 2023.

1.2 *Activity*

The company is engaged in all activities related to real estate development for lands, buildings and facilities including acquisition of land and real estate sale and rental, dividing it and providing all types of facilities necessary for reconstruction and connected to it in Nasr City and other areas nationwide, the purchase and development, utilization, leasing and sale of all buildings and land. The company can establish, manage and invest all residential, administrative, tourists, recreational and all projects necessary to achieve these purposes, and all real estate, financial, commercial and entertainment operations related to these purposes.

BIG Investment Group Limited - Britain - is considered the main shareholder of the company.

1.3 *Duration*

According to the company's Articles of Association, the company's term is 50 years starting from 23/12/1996 to 22/12/2046.

1.4 *Location*

The company's head office is located at 4, Youssef Abbass St., 2nd Area, Nasr City, Cairo, Egypt.

The Chairman is Eng. Mohamed Hazem Barakat. The company is listed on Egyptian Stock Exchange and London Stock Exchange on GDR admission system.

The company's Board of Directors has approved the issuance of the separate financial statements for the period ended 30 June 2026 on 6 August 2026.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS

30 June 2026

2. USE OF ESTIMATES AND JUDGMENTS

The preparation of separate financial statements in accordance with Egyptian Accounting Standards requires management to make judgments, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumption are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about the carrying values of assets and liabilities. Actual results may differ from those estimates.

The estimates and underlying assumptions are reviewed on a continuous basis. Revisions to accounting estimates are recognized in the year in which the estimate is revised and the future periods if it affects future periods.

The following estimates and judgments that affect the financial statements:

- Estimate useful lives of fixed assets, intangible assets and investment properties.
- Provisions and contingent liabilities.
- Impairment of financial and non-financial assets.
- Taxation
- Liabilities for utilities completion
- Amortization of the discount of present value for notes receivable (Financing component).
- Expected credit loss

Fair value Measurement

The fair value represents the price that the company would receive in exchange for selling the asset or the consideration paid to transfer the liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the assumption that the transaction to sell the asset or transfer the liability will occur in the principal market for the asset, liability, or market that will yield the most interest on the asset or liability.

The fair value of the asset or liability is measured using assumptions that market participants would use when pricing the asset or liability, on the assumption that market participants will pursue their economic interests.

The measurement at the fair value of the non-financial asset takes into account the market participant's ability to generate economic benefits by using the asset to the maximum acceptable degree or by selling it to another market participant who would use the asset to its maximum capacity.

For assets traded in an active market, the fair value is determined by reference to the quoted market bid prices.

The fair value of interest-bearing items is estimated based on discounted cash flows using interest rates on similar items with similar terms and risk characteristics.

For unlisted assets, fair value is determined by reference to the market value of a similar asset or based on the expected discounted cash flows.

2. USE OF ESTIMATES AND JUDGMENTS - *Continued*

The company uses valuation methods that are appropriate in the surrounding circumstances and for which sufficient data are available to measure the fair value, thus maximizing the use of relevant observable data and minimizing the use of data that cannot be observed to a minimum.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are classified into significant categories based on the fair value measurement as a whole:

- **The first level:** using trading prices (unadjusted) for fully identical assets or liabilities in active markets.
- **The second level:** by using inputs other than the trading prices contained in the first level, but that can be observed for the asset or liability directly (that is, prices) or indirectly (that is, derived from prices).
- **The third Level:** inputs for the asset or liability that are not based on observable market data (unobservable inputs).

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

3.1 Basis of preparation of the separate financial statements

- The separate financial statements are prepared in accordance with the Egyptian Accounting Standards in light of relevant Egyptian laws and regulations.
- The separate financial statements are presented in Egyptian Pounds which presents the functional currency of the group.
- According to the Egyptian Accounting Standard No. 42 (Consolidated Financial Statements) and Article 188 of the Executive Regulations of the Companies Law No. 159 of 1981, the company prepares separate financial statements
- According to the company's Article No. (41) bis to (41) bis of the capital market law promulgated by Law No. 95 of 1992 apply to securitization treatments in the financial statements.

New issuing and amendments to the Egyptian Accounting Standards

On March 6, 2023, Prime Minister Decision No. (883) of 2023 was issued to amend and issue some provisions of the Egyptian Accounting Standards issued No. 110 of 2015, and amended on March 18, 2019, by a decision of the Minister of Investment and International Cooperation, which includes some new accounting standards and amendments to some existing standards, which were published in the Official Gazette on March 6, 2023.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

3.2 Fixed assets and depreciation

Recognition and measurement

Fixed assets are recorded on purchase at cost and are presented in the statement of financial position net of accumulated depreciation and impairment losses (Note 4). Historical costs include costs associated with the purchase of the asset. For assets constructed internally, the cost of the asset includes the cost of raw materials, direct labor and other direct costs incurred in bringing each asset to its location and the purpose for which it was acquired, as well as the costs of removal and rearrangement of the site, where the assets are located.

Components are accounted for on an item of fixed assets that have different useful lives as separate items within those fixed assets.

Subsequent costs

The carrying amount of fixed assets includes the cost of replacing a part or component of such assets when it is expected to obtain future economic benefits as a result of spending that cost. Other costs allocated to the separate income statement as an expense when incurred.

Any gain or loss on disposal of an item of fixed assets is recognized in profit or loss.

Depreciation

Depreciation is provided on a straight-line basis to write off the cost less estimated residual value of each asset - other than land - over its expected useful life. Except for land. The estimated useful lives of fixed assets are reviewed periodically. Based on the periodic review, the useful lives and depreciation rates for computers and servers were adjusted for the fiscal year 2024 from (5-8) years to (4) years, in accordance with the Board of Directors' approval on February 25, 2024

Based on the periodic review, the aging and depreciations rates of fixed assets are as follows:

<u>Asset Type</u>	<u>Estimated useful life</u>
Buildings	40 years
Improvements - Owned building	8 years
Improvements - Leasehold building	5 years or the duration of the lease which is lower
Machinery and equipment for production	5 years
Motor vehicles	5 years
Computers and servers	4 years
Tools and equipment	2 years
Furniture and office equipment	2-8 years

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Fixed assets under construction

Fixed assets under construction are recorded at cost which includes all the direct costs incurred on the assets to reach its final position. These are transferred to fixed assets or investment property or intangible assets when the asset is complete and ready for its intended use. Fixed assets under construction are recorded at cost less impairment, if any.

3.2.2 *Intangible assets (Software and IT)*

Recognition

Assets of a non-monetary nature that are identifiable and have no physical existence and that is held for purposes of use and from which future benefits are expected to flow are treated as intangible assets.

The first measurement at recognition

Intangible assets are measured at cost, which is represented in the monetary price on the date of evidence, and in the event that payment is postponed for periods exceeding the followed credit periods, the difference between the cash price and the total amount paid is recognized as interest. Intangible assets are shown net, net of depreciation and impairment.

Subsequent expenditures

Subsequent expenditures on the acquisition of intangible assets are capitalized only when these expenditures increase the future economic benefits of the related asset, and all other expenditures are charged to the income statement (profits or losses) when incurred.

Amortization

Amortization is charged to the income statement (profits or losses) according to the straight-line method over the life of the useful life of the intangible assets, and this is the amortization of intangible assets from the date in which they are available for use, but if the useful life of the intangible assets is not specified then it is done. Carrying out impairment testing on a regular basis at the date of each financial position for these assets.

Useful life

Software & information systems

1 year

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

3.2.3 *Investment in subsidiaries*

A subsidiary is a company in which the company owns more than 50% of the share capital and the company exercises the right to control the investee when the company is exposed or entitled to variable returns through the company's contribution to the investee company and has the ability to affect those returns through its authority over the company. Therefore, the company controls the investee company when the company has all the following:

- Power over the investee.
- Exposure or right to variable returns by contributing to the investee company.
- The ability to use the authority on the investee company to influence the amount of proceeds obtained from it.

Investments in subsidiaries are carried at cost less impairment losses, if any. In case of impairment, the carrying amount of the impairment loss is reduced and charged to the separate statement of income for each investment. The impairment loss is reversed in prior periods so that the carrying amount of the investment does not exceed its original net worth before the impairment loss is recognized in value.

3.2.4 *Financial instruments*

1) Recognition and initial measurement

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

2) Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortized cost; FVOCI – debt investment; FVOCI – equity investment; or FVTPL.

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Financial assets at amortized cost:

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is to hold assets to collect future cash flows.
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Financial assets at FVOCI (Debt instrument):

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- It is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets.
- Its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at FVOCI (Equity instrument):

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an investment-by-investment basis.

Financial assets at FVTPL:

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets.

On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

Financial assets- Business Model Assessment:

The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed, and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management; and
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated – e.g. whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Debt instruments at FVOCI

These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On de-recognition, gains and losses accumulated in OCI are reclassified to profit or loss.

Equity investments at FVOCI

These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment

Financial Liabilities - Classification, Subsequent Measurement, Profits or Loss

Financial liabilities are classified as at amortized cost or at fair value through profit or loss.

Financial liabilities are classified as fair value through profit or loss if they are classified as held for trading at initial recognition.

Financial liabilities measured at fair value through profit or loss are measured at fair value and net gains and losses, including interest expense, are recognized in profit or loss.

Other financial liabilities are measured at amortized cost using the effective interest method. Interest expense and gains and losses from changes in foreign exchange rates are recognized in profit or loss. Gains and losses resulting from disposal are recognized in profit or loss.

Disposals

Financial assets

The company derecognizes the financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the contractual rights to receive the contractual cash flows

from the financial asset, or it transfers the contractual rights to receive the cash flows in a transaction in which all the risks and rewards of ownership of the financial asset have been transferred materially, or in which the Company neither transfers nor retains substantially all the risks and rewards of ownership and does not retain control of the financial assets.

Financial obligations

Financial liabilities are derecognized when the contractual obligations are discharged, canceled or expired.

The company also derecognizes the financial obligations when their terms are modified and the cash flows of the modified obligations differ substantially, in which case the new financial obligations are recognized on the basis of the modified terms at fair value.

On derecognition of financial liabilities, the difference between the carrying amount and consideration paid (including any non-monetary assets transferred or liabilities assumed) is recognized in profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Transfers of financial assets to third parties in transactions that do not qualify for de-recognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.

Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

Financial assets – Assessment whether contractual cash flows are solely payments of principal and interest:

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.

In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:

- Contingent events that would change the amount or timing of cash flows;
- Terms that may adjust the contractual coupon rate, including variable-rate features;
- Prepayment and extension features; and
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non-recourse features).

A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable additional compensation for early termination of the contract. Additionally, for a financial asset acquired at a discount or premium to its contractual per amount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable additional compensation for early termination) is treated as consistent with this criteria if the fair value of the prepayment feature is insignificant at initial recognition.

Financial assets – Subsequent measurement and gains and losses:

Financial assets at amortized cost

These assets are subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on de-recognition is recognized in profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

3.2.5 *Investment properties*

Investment properties are measured at cost model, and measured later using the fair value model and the outcome of revaluation of investment properties is charged to the statement of other comprehensive income, and in case of revaluation loss it decrease first from revaluation surplus, and if it exceeds the revaluation surplus it charged to the statement of income. The cost model is used for investment properties which has no reliable fair value in accordance to para 53 of investment properties standard, and depreciation expense charged to the separate statement of income according to the straight-line method over the estimated useful life of all investment property except the land. In case of such assets are impaired, the loss is included in the separate income statement.

<i>Asset Type</i>	<i>Estimated useful life</i>
Residential	40 years
Non-residential units	40 years

3.2.6 *Securitization*

The company dispose the notes receivable which were sold through securitization, from the accounting records and recognize the difference between current value and cash value received through securitization as finance cost in the separate statement of profit or loss.

3.2.7 *Lands, unfinished and finished properties*

All cost incurred on lands, unfinished and finished properties are included in this account. At point of sale, this account is adjusted based on actual per meter cost of land or units sold. Lands, unfinished and finished properties are measured at the lower of cost and net realizable value. In case of decrease the net realizable value under the cost, the decrease is charged to the statement of income.

3.2.8 *Separate statement of cash flows*

The separate statement of cash flow is prepared according to the indirect method. Earned and paid interest, employees share in profit, and Board of Directors remunerations are being classified in operating activities.

3.2.9 *Cash and cash equivalents*

Cash and cash equivalents includes cash on hand, bank current accounts, and treasury bills due within three months and investments through profit or loss, less pledged time deposits against letters of guarantee and credit banks (credit facilities), bank current accounts and time deposits of compound maintenance deposits which is collected and managed for the favor of customers are not included in cash and cash equivalent of the company.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

3.2.10 *Trade receivables, notes receivable and other debit balances*

Trade accounts receivable stated at cost net of allowance for doubtful debts, which is estimated for amounts not expected to be collected in full. Other debit balances are being stated at cost less any impairment losses. (If any)

The notes receivables are the value of Post-Dated Checks (PDCs) obtained from the customers in payment of the remaining contractual values of the contracted real estate units. The initial recognition of the notes receivable is at fair value at the time the contract is entered into with the customers. At the date of preparation of the separate financial statements; notes receivables are re-measured at amortized cost; which is determined by discounting the future cash flows of the notes using the rate of return that discounts the nominal value of the instruments to the current cash price for selling the real estate units.

3.2.11 *Asset's impairment*

Non-Financial Assets

At the separate financial statements date, the company reviews the carrying amounts of its owned non-financial assets to determine whether there is any indication that those assets may be impaired. If any such indication exists, the company estimates the recoverable amount for each asset separately in order to estimate the impairment losses. In case the recoverable amount of the asset cannot be properly estimated, the company estimates the recoverable amounts for the cash-generating unit which is related to the asset.

In case of using a reasonable and consistent basis for allocating of the assets to the cash generating units, the company's general assets would be also allocated to these units. If this is unattainable, the general assets of the company shall be allocated to the smallest group of the cash-generating units, which the company determined using logical and fixed bases.

The asset recoverable amount or the cash-generating unit is represented by the higher of the fair value (less the estimated selling costs) or the estimated amount from the usage of the asset (or the cash generating unit).

The estimated future cash flow from the usage of the assets, or the cash generating unit using a discount rate before tax is discounted in order to reach the present value for these flows which represents the estimated amount from using the asset (or the cash generating unit).

This rate reflects current market assessments of the time value of money and the risks specific to the asset, which were not taken into consideration when estimating the future cash flow generated from it. When the recoverable amount of the asset (cash generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (cash generating unit) is reduced to its recoverable amount with the impairment loss recognized immediately in the separate income statement.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

In case the impairment on asset (or cash generating unit) decreases subsequently, and this decrease is related in a logical manner to one event or more taking place after the initial recognition of the impairment at the profit or losses, a reversal is done for the revised amount of losses (or a part of it)- which had been recognized previously- in the separate income statement, and the carrying amount for the asset is increased (or the cash generating unit) with the new estimated recoverable amount provided that the revised carrying amount of the asset after revising (or the cash generating unit) does not exceed the carrying amount determined for the asset, had the recognized losses resulting from impairment, not been recognized in previous years

Financial Assets

The company applies a three-stage approach to measuring the expected credit losses from financial assets carried at amortized cost and debt instruments at fair value through other comprehensive income. Assets go through the following three phases based on the change in credit quality since their initial recognition.

Stage 1: The expected credit loss over 12 months

Stage one includes financial assets on initial recognition that do not have a significant increase in credit risk since initial recognition or that have relatively low credit risk. For these assets, 12-month ECL is recognized and interest is charged on the total carrying amount of the assets (without deducting the credit provision). 12-month ECL This is the expected credit loss that could result from defaults likely within 12 months after the date of the financial statements.

Stage 2: the expected credit loss over the life - with no impairment of the value of credit

Second stage includes financial assets that have had a significant increase in credit risk since initial recognition but there is no objective evidence of impairment. Lifetime ECL is recognized for those assets, but interest continues to be charged on the total carrying amount of the assets. Lifetime ECL is the expected credit loss arising from all possible defaults over the expected life of the financial instrument.

Stage 3: Lifetime Expected Credit Loss – Credit Impairment

Stage three includes financial assets for which there is objective evidence of impairment at the reporting date; For these assets, a lifetime ECL is recognized.

At the end of each reporting date, the company determines whether there is any indication that its financial assets may be impaired.

Financial assets are exposed to impairment when an objective evidence that the estimated future cash flow have been affected by the event or more established at a date subsequent to the initial recognition of the financial asset.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

The carrying value of all financial assets is reduced directly with the impairment losses except those related to the reduction in the expected value of the collections from the customers debts and other debit balances, where a formed allowance for impairment loss is done on its value. When the debt of the clients or the owner of the debit balance is uncollectible, a written off discount is applied upon this account. All the changes in the book value relating to this account are recognized in the separate income statement.

3.2.12 Provisions

Provisions are recognized when there is a present legal or constructive obligation as a result of a past event, it is probable an outflow of resources embodying economic benefits will be required to settle this obligation and a reliable estimate can be made for the obligation.

Provisions are reviewed at the separate financial position date and adjusted (if necessary) to present the best current estimate.

3.2.13 Treasury shares

Treasury shares are recorded at cost and deducted from shareholders equity. Gain or loss from sale of shares is included in equity.

3.2.14 Dividends

Dividends are recorded as liability during the year when declared.

3.2.15 Revenue recognition

1. Revenue from customer contracts

The Company applied the EAS No. 48 as of January 1, 2021. Information about the Company's accounting policies relating to contracts with customers is provided in five steps as identified (in Note No.5-B):

Revenue from contracts with customers is recognized by the company based on five step modules as identified in EAS No. 48:

Step 1: Determine the contract (contracts) with customer: A contract is defined as an agreement between two or more parties that meets the rights and obligations based on specified standards which must be met for each contract.

Step 2: Determine the performance obligations in contract: Performance obligations is a consideration when the goods and services are delivered.

Step 3: Determine the transaction price: Transaction price is the compensation amount that the Company expects to recognize to receive for the transfer of goods or services to customer, except for the collected amounts on behalf of other parties.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Step 4: Allocation of the transaction price of the performance obligations in the contract: If the service concession arrangement contains more than one performance obligation, the Company will allocate the transaction price on each performance obligation by an amount that specifies an amount against the contract in which the Company expects to receive in exchange for each performance obligation satisfaction.

Step 5: Revenue recognition when the entity satisfies its performance obligations.

The Company satisfy the performance obligation and recognize revenue over time, if one of the following criteria is met:

- a) Company performance does not arise any asset that has an alternative use of the Company and the Company has an enforceable right to pay for completed performance until the date.
- b) The Company arise or improves a customer-controlled asset when the asset is arising or improved.
- c) The customer receives and consumes the benefits of Company performance at the same time as soon as the company has performed.

Revenue from customer contracts is recognized at point of time if the performance obligations are not fulfilled over a period of time. All remaining benefits, in this case the company must recognize revenue because it has fulfilled its performance obligations.

When the company satisfies the performance obligation by providing the promised goods and services, it creates the principal of the contract based on the amount achieved through performance. When the amount collected from the customer exceeds the amount of revenue recognized, a contract obligation arises.

Revenue is measured at the fair value of the consideration received or receivable, taking into account the contractual terms specified for the payments. The Company evaluates revenue contracts against specific criteria to determine whether it is acting as principal or agent. The company concluded that it was acting as a major supplier in all of its revenue contracts.

The Company adjusts the transaction price for the effect of the significant financing component by discounting it using the rate that would be reflected in a separate financing transaction between the Company and its customers on the contract inception date.

The company pays sales commission for contracts it obtains to sell certain units of real estate and capitalizes the additional costs of obtaining a contract that meet the criteria in Egyptian Accounting Standard No. 48. These costs are recognized when revenue is recognized. The capitalized costs of acquiring such contracts are presented separately as a current asset in receivables and other receivables and amortized in selling and marketing expenses in the statement of profit or loss.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Revenue recognition

Real Estate sales

Revenue from the sale of contracted residential administrative and commercial units shall be proven upon the transfer of control to customers in accordance with the stages of delivery as sale value in accordance with contracts with customers for such units. The revenues of such units shall be proven at a point of time net of the units that the customers have transferred control over.

Land sales

Land sale revenue are recognized when control transfers from the company to customers when the land is actually delivered to customers provided that the facilities are completed and revenue from the land proven at a point of time for the land that have been transferred to the customers.

Interest income

Interest income is recognized on an accrual basis using the effective interest rate is the rate used to deduct future cash payments expected to be made or collected during the financial instruments life expectancy/or if appropriate, a lesser period of time) to be fully equal the financial assets book value or financial obligation.

2. *Joint arrangement*

A joint arrangement is an arrangement in which two or more parties have joint control. It is either a joint operation or a joint venture. A joint arrangement is that the parties are bound by a contractual agreement granting joint control to two or more parties of the arrangement.

The classification of a joint arrangement as a joint operation or a joint venture depends on the rights and obligations (undertakings) of the parties to the arrangement. The joint operation becomes a joint arrangement when its parties have joint control over the rights over the assets and the obligations associated with the arrangement. These parties are called joint operators. A joint venture is a joint arrangement when its parties have joint control over the rights over the net assets associated with the arrangement. These parties are called shareholders in joint ventures. The entity shall apply the judgment in assessing whether the joint arrangement is a joint venture or a joint venture.

The joint operator shall account for assets, liabilities, income and expenses related to its share in the joint operation in accordance with the Egyptian Accounting Standards applicable to such assets, liabilities, revenues and expenses.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS

30 June 2026

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

On 31 December 2015, the Company adopted a new strategy to execute a joint operation development contract based on a share in the revenue of the sales. The Company receives its share against the land provided for development by the other co-developer who will receive the rest of the sale revenue against incurring the development cost. (Note: This contract type doesn't represent the company's current strategy).

3. *Other revenues*

- Rental income is recognized on a time-apportioned basis.
- Dividend income is recognized in the separate statement of income when the right to receive dividends from the investee is established and is recognized after the date of acquisition.

3.2.16 *Direct and indirect cost*

The actual costs of establishing real estate units are capitalized within (a work in progress and finished properties) costs are charged according to contractors and suppliers extracts after the company's technical affairs department has approved those extracts, the costs are appointed among the units on the basis of the actual completion of each phase in accordance with the following bases:

- The units share of attached long cost allocated for the establishment of the units, when is distributed on the basis of the long area of each unit in the residential assembly.
- The units share of the actual construction costs distributed on the basis of contracts and invoices for all units within each phase.
- The units share of actual interest costs and finance expenses based on the units' direct costs to the total costs of units for the residential assembly of each phase.

3.2.17 *Other operating expenses and residential community measurement*

An expense represents the cost of temporary operating activity for residential compounds until delivering the units to the customers.

3.2.18 *Employees' benefits*

The company contributes to the social insurance scheme for the benefit of its employees in accordance with the Social Insurance Law. No.79 of 1975 and its amendments Contributions of workers and employers are calculated at a fixed rate of wages. The company's commitment is represented in value of its contribution.

The company's contributions are charged to the consolidated statement of income. The company gives employees who have reached retirement age, end of service gratuity up to a maximum of L.E. 50 thousand. At 21 December 2022 BOD decided to increase the amount of end of services gratuity to be L.E. 100,000 instead of L.E. 50,000. The Company also applies an optional early retirement scheme. End of service benefits for employees benefiting from this system are charged to the consolidated statement of income in the year in which they are approved for early retirement.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

3.2.19 *Taxation*

Income tax

Taxation is accounted according to Egyptian laws and regulations.

Income tax expense that is calculated on the profits of the company represents the sum of the tax currently payable (calculated according to the applied laws and regulations and using the tax rates prevailing as of the separate financial statements date) and deferred tax. Current and deferred taxes are recognized as income or expenses and included in the profits or losses of the year except for instances that taxes are established from:

- A transaction or event recognized, in the same year or other year, outside profit or loss either in other comprehensive income or directly in equity, or
- Business combinations.

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities according to the accounting basis used in the separate financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year in which the liability is settled or the asset realized, based on tax rates that have been enacted or substantively enacted at the separate financial statements date.

Deferred tax liabilities are generally recognized (generated from taxable temporary differences in the future) while deferred tax assets recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reduced to the extent that it is no longer probable that sufficient taxable profits will be available in future years to allow all or part of the asset to be recovered. The balance sheet method is used in accounting for deferred assets and liabilities and they are recognized as non-current assets and liabilities.

3.2.20 *Earnings per share*

Earnings per share are calculated by dividing the net profit for the year, after deducting employees share and Board of Directors remuneration, by the weighted average number of outstanding shares during the year.

3.2.21 *Borrowing cost*

Borrowing costs directly attributable to the acquisition, construction or production of a qualified asset for capitalization of cost of borrowing; are capitalized as part of the cost of the asset. Other borrowing costs are charged as an expense in the separate statement of income on a time-apportioned basis using the effective interest rate.

An asset eligible to bear the cost of borrowing necessarily requires a long year of time to process it for use for its intended purposes or to sell it. This applies to land and building facilities items as fixed assets under construction (under construction projects) and incomplete inventory of reconstruction and housing projects.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Capitalization of borrowing costs begins as part of the cost of the qualifying asset to bear the cost of borrowing when:

- Expenditure on the qualified asset.
- The Company incurs a borrowing cost.
- The activities required for the preparation of the asset for use for purposes specified for it or for its sale to others are currently under implementation.

Capitalization of borrowing costs is suspended during periods in which the effective construction of the asset is impaired. Capitalization is contingent upon the completion of all material activities necessary to prepare the qualifying asset to bear the borrowing cost for its intended use or to sell it to third parties.

3.2.22 *Legal reserve*

As required by the Companies Law No. 159 of 1981 and the company's Articles of Association, 5% of the profit for the year is transferred to the legal reserve. The company may resolve to discontinue such annual transfers when the reserve totals 50% of the issued share capital. The legal reserve cannot be distributed except in cases stated in the Law.

3.2.23 *Foreign currency transactions*

The company's functional currency is the Egyptian pound. Transactions in foreign currencies are recorded at the rate ruling at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies at the separate financial position date are translated at the rate of exchange ruling at that date. Retranslation exchange profit or loss is taken to the separate statement of income.

3.2.24 *Related parties' transactions*

Related parties' transactions carried out by the company within its normal course of business, are recognized pursuant to the conditions set out by the Board of Directors on an arm's length basis.

3.2.25 *Takaful contribution*

Takaful contribution system mandated by Law No. 2 for 2018 has been adopted on 12 July 2018 and is applied all entities whether individual or corporate regardless of their nature or legal form.

3.2.26 *Lease contracts*

Recognition and measurement

At the commencement date, the company recognizes the right of use asset and a lease liability as flows:

Initial measurement of the right of use asset

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS

30 June 2026

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

At the commencement date of lease contract, the right of use assets is measured at "cost" which is:

- The initial measurement of lease contract liability which is presented in the paragraph below.
- Any lease payments made at or before the commencement date, less any lease incentives received.
- Any initial direct costs incurred by the lessee.
- An estimate of costs to be incurred by the lessee in dismantling and removing the underlying asset, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease contract, unless those costs are incurred to produce inventories, the lessee incurs the obligation for those costs either at the commencement date or as a consequence of having used the underlying asset during a particular year.

Initial measurement of the lease liability

At the commencement date, the lessee measures the lease liability at the present value of the lease payments that are not paid at that date. the lease payments shall be discounted using the interest rate implicit in the lease contract, if that rate cannot be readily determined, the lessee shall use the lessee's incremental borrowing rate.

At the commencement date, the lease payments included in the measurement of the lease liability comprise the following payments for the right to use the underlying asset during the lease term that are not paid at the commencement date:

- Fixed payments, less any lease incentives receivable.
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date.
- Amounts expected to be payable by the lessee under residual value guarantees.
- The exercise price of a purchase option if the lessee is reasonably certain to exercise that option.
- Payments of penalties for terminating the lease, if the lease term reflects the lessee exercising an option to terminate the lease.

Recognition and measurement of the company as lessor:

The company classifies each lease contract as operating lease or as financing lease as follows:

Operating lease

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

The company recognizes lease payments from operating leases income either in instalment method or on any other regular basis if that basis is more reflective of the pattern in which the use of the asset under contract decreases.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES - *Continued*

Sale and leaseback contracts

In the case of sale and leaseback, the transfer of assets shall be evaluated if the sale of the buyer obtains control over the assets, directs its use and obtain the remaining benefits its from it or is not a sale as follows:

Asset transfer represent a sale

The assets is established as a right of utilizations in accordance with the requirements of Egyptian accounting standard No: 49 on right of used against recognized of the lease liability at the present value of the lease payments as liability as set out in the policy for initial measurement of the assets of the benefit, where the contract is classified as a lease in this case.

Asset transfer is not a sale

The asset transferred to the company's books shall be recognized as an assets against a financial obligations equal to the receipts of the transfer of the contract. this obligation shall be accounted for in accordance with Egyptian standard No. 47 in this case, the contract shall be classified as secured financing contract.

Exemption from recognition:

The company may choose not to recognize right-of-use assets and lease obligations for short-term leases with a lease term of 12 months or less and leases for low-value assets. The Company recognizes the rental payments associated with these contracts as an expense on a straight-line basis over the lease period.

10. DEBTORS AND OTHER DEBIT BALANCES – Continued

- (**) According to paragraph (91) of Egyptian Accounting Standard No. (48) *Revenue from Contracts with Customers*, an entity must recognize the incremental costs of obtaining a contract as an asset if it expects to recover those costs, provided that such costs would not have been incurred if the contract had not been obtained (e.g., sales commission). The mentioned amount represents sales commissions related to unearned revenue from contracts with customers until June 30, 2026.
- (***) On July 10, 2024, the company signed a revenue-sharing development contract for a fully serviced residential project on a 238-feddan plot in Mostakbal City with Madar for Investment and Urban Development. According to the contract, an advance payment of L.E. 1.07 billion was made to Madar as part of its share in the project's revenue, to be settled against future revenues, in addition to paying an amount of 474,672,619 L.E., the guaranteed minimum difference from the partner's share in the sale proceeds until June 30, 2026, in addition, an amount of L.E. 114,624,322 represents the first installment of maintenance.
- (****) On July 10, 2024, the company signed a revenue-sharing development contract for a fully serviced residential project on a 491-feddan plot in New Heliopolis City with Misr El Gedida for Housing and Development. According to the contract, an advance payment of L.E. 1.10 billion was made to Misr El Gedida as part of its share in the project's revenue, to be settled against future revenues, in addition to paying the guaranteed minimum difference of 957,912,103 Egyptian pounds from the partner's share in the sale proceeds until June 30, 2026.
- (*****) On October 23, 2024, the company signed a revenue-sharing development contract for a fully serviced residential project on a 42-feddan plot in *New Heliopolis City* with *Zahraa El Maadi for Investment and Development*. According to the contract, an advance payment of L.E. 200 million was made to Zahraa El Maadi as part of its share in the project's revenue, to be settled against future revenues, in addition to paying an amount of 266,312,633 Egyptian pounds, the guaranteed minimum difference from the partner's share in the sale proceeds until June 30, 2026.

36. TAX POSITION

• **Corporate tax**

The company submitted its tax returns and amended returns on the legally prescribed dates, and the company paid taxes based on these returns after being approved by the company's tax advisor until 2025.

Years from the start of the activity until 2017

The tax examination between the company and the Tax Authority for those years has been terminated, and the due tax has been paid in full, according to the decisions of the internal committees, the appeal committees, and the dispute settlement committees.

Years from 2018 to 2019

A Tax Form 19 for those years was submitted to the company, and the tax office conducted an estimated assessment based on Tax Form 19 issued with number 313 on 8/4/2024. A challenge was filed against the form within the legal deadlines, and preparations are underway to compile the documents for the field inspection with the tax authority. According to the tax authority's inspection method, a provision has been made for the expected points of dispute.

NOTES TO THE INTERIM SEPARATE FINANCIAL STATEMENTS

36. TAX POSITION – *Continued*

Years 2020 to 2022

The company has been notified of the tax inspection, and the required documents are currently being prepared for the field examination by the Tax Authority. Based on the Tax Authority's approach in examining prior years, an estimated provision has been recognized for the expected disputed items.

Years 2023 to 2024

No inspection has been conducted by the Tax Authority for these years, and the company has not received any assessment forms for such years to date. Based on the Tax Authority's usual examination approach, an estimated provision has been recognized for the expected disputed items.

- ***Payroll tax (employment earning)***

The years from the start of the activity until 2022

The tax dispute between the company and the tax authority for those years has been settled and the tax due has been paid in full.

The years are from 2023 to 2024

The tax examination for these years has not been carried out, and the company has not been notified of any assessment forms to date, and according to the method of the Tax Authority in the examination, the estimated provision for points of disagreement has been formed.

- ***Stamp tax***

The years from the start of the activity until 2020

The tax dispute between the company and the tax authority has been terminated and the tax due has been paid in full.

The years are from 2021 to 2025

The tax inspection for that period has not yet been conducted, and the company has not been notified of any tax assessment forms to date. Based on the previous examination approach, an estimated provision has been recognized for the expected disputed items.

- ***Real estate tax***

The years are from 2013 to 2025

The tax returns were submitted within the legally prescribed deadlines, and the tax due was paid for the properties for which the relevant tax assessment forms were received. A provision has been recognized for the tax relating to properties for which no tax assessment forms have been received to date.

37. FINANCIAL INSTRUMENTS AND RELATED RISKS

On-financial position financial instruments comprise cash and bank balances, financial investments, debtors, creditors, and amounts due from/to related parties, Notes to the separate financial statements include the accounting policies adopted in the recognition and measurement of financial instruments.

The significant risks associated with the financial instruments and the procedures followed by the company to mitigate these risks are as follows:

- ***Credit risk***

Credit risk is the risk that debtors fail to settle the amounts due from them, the company seeks to reduce this risk to the minimum by agreeing with the customers to transfer property after settling all of their debts, also the company takes delay penalties upon later installments which exceeded their due dates calculated on settlement.

- ***Liquidity risk***

Liquidity risk represents all factors which affect the company's ability to pay part or all of its obligations, according to the company's policy sufficient liquidity is maintained which reduce the risk to the minimum.

The company heavily relies on cash collection from sales and manages cash balances to ensure the necessary liquidity for operational activities, financing and new expansions in addition timely payment of taxes and distributions, all aimed at reducing financial burdens and minimizing liquidity risk as much as possible.

The following are due dates of the liabilities:

	<i>Less than one year L.E.</i>	<i>1 – 2 years L.E.</i>	<i>More than 2 years L.E.</i>	<i>Book value L.E.</i>
