Limited Review Report

To The Members of Boards of Directors Of
ORIENTAL WEAVERS COMPANY FOR CARPETS

Introductory

We have reviewed the accompanying separate interim financial position of Oriental Weavers Company for Carpets "S.A.E" as at September 30, 2026 and the separate interim statement of Profit or loss , separate Interim statement of comprehensive income, separate Interim statement of changes in equity and separate interim statement of cash flow for the Nine months then ended, and a summary of significant accounting policies and other explanatory notes. These separate Interim financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these separate Interim financial statements based on our review.

Scope of limited review

We conducted our review in accordance with Egyptian Standard on Review Engagements 2410, Review of Interim Financial Information Performed by the Independent Auditor of the Entity. A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Egyptian Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying separate interim financial statements do not give a true and fair view for the separate interim financial position of the Company as of September 30, 2026 and of its financial performance and its cash flows for the Nine months then ended in accordance with Egyptian Accounting Standards.

Cairo: November 15, 2026

1-5 The Company is listed in Egyptian exchange.

1-6 **Company's Headquarter**

The Company located at Tenth of Ramadan city – Industrial zone – Sharkia.

1-7 The Financial Statements are approved for issue by the Board of Directors on 15 November 2026

2 - BASIS OF PREPARATION OF SEPARATE FINANCIAL STATEMENTS

2-1 Statement of compliance

- The Separate financial statements have been prepared in accordance with Egyptian Accounting Standards and in the light of Egyptian laws and regulations.
- The Egyptian Accounting Standards requires refer to the International Financial Reporting Standards when no Egyptian accounting standard or legal requirements illustrate how to treat specific balances or transaction.

2- 2 Basis of measurement

- The Separate financial statements have been prepared using historical cost, modified by the results of revaluation differences of financial assets and liabilities at fair value through profit and loss as shown in the accounting policies mentioned below.

3 - USE OF JUDGMENTS AND ESTIMATES

- The preparation of Separate financial statements according to the Egyptian Accounting Standard requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about the carrying values of assets and liabilities that are readily apparent from other sources. Actual results may differ from these estimates. The note no. (4) From the notes of the financial statements indicates the items and the elements that have significant accounting estimates.

- Estimates and underlying assumption are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and future periods if the revision affects both current and future periods.

3-1 Fair Value Measurement

- The fair value of the financial instruments is determined based on the quoted price for the financial instrument or similar instruments at the financial statement date. The financial assets value is determined based on current purchase price for these assets; while the financial liabilities value is determined based on current prices for which these liabilities settled.
- In the absence of an active market, the fair value is determined using various valuation techniques taking into consideration the transactions recent prices, current fair value for the other similar instruments substantially, discounted cash flows or any other valuation technique which resulting in reliable values.
- When using the discounted cash flow method as a valuation technique, the future cash flows are estimated based on management's best estimates. The discount rate used is determined in the light of the prevailing market price at the date of the financial statements of financial instruments are similar in nature and terms.

4 - SIGNIFICANT ACCOUNTING POLICIES

4-1 Foreign currency Translation

a- Presentation and Transaction Currency

The Financial Statements are presented in Egyptian pound which represents the company presentation and transaction currency.

b- Transaction and Balances

Transactions denominated in foreign currencies are recorded at the prevailing exchange rates at the date of the transaction. At Separate financial position date monetary assets and liabilities denominated in foreign currencies are revaluated at the exchange rates declared by the company's bank and its subsidiaries' bank at that date.

Assets and liabilities items that are measured at fair value in a foreign currency shall be translated using the exchange rates at the date when the fair value was measured.

Non-monetary items that are measured at historical cost in a foreign currency shall be translated using the exchange rates at the date of transaction.

Generally, the exchange differences are recorded in the Separate income statement for the period.

4-2 Fixed Assets and Depreciation

a- Recognition and Initial Measurement

Fixed assets are recognized initially at cost and subsequently at cost less accumulated depreciation and accumulated impairment losses-if exist.

b- Subsequent Cost

The Company recognizes the carrying amount of Parts of some Items of Fixed assets may require replacement, the cost of replacing part of such an item is recognized when criteria are met and after de-recognition the carrying amount of those parts that are replaced and when

replacement have probable future economic benefits and can be measured reliable, any other costs are recognize at income statement.

c- Depreciation

Depreciable value is determined based on fixed asset cost less its residual value. Residual value is representing the net value resulting from dispose-off the asset, if the asset were in its condition after its useful life.

Depreciation of assets is charged in the income statement on a straight-line basis over the estimated useful lives of each part of fixed assets. Land is not depreciated. The estimated useful lives are as follows:

Description	Estimated useful life (Year)
Buildings & Constructions	25-50
Machinery & Equipment	10
Vehicles	5-8
Tools & Supplies	5
Show-room Fixture	3
Furniture & office equipment	5-10
Computers & programs	3

Useful lives, depreciation method and residual value of assets are reviewed annually, and amendments are applied if there is a significant change in the earning of the economic benefits generated from these assets.

4-3 Projects in Progress

Projects in progress are recognized initially at cost. Cost includes all expenditures directly attributable to bringing the asset to a working condition for its intended use.

Projects in progress are transferred to property, plant and equipment caption when they are completed and are ready for their intended use.

4-4 Investments in subsidiaries

Subsidiaries are companies that the company has the control over it, the control is achieved if the company has all the following:

(a) Power over the investee;

(b) Exposure, or rights, to variable returns from its involvement with the investee; and

(c) The ability to use its power over the investee to affect the amount of the investor's returns.

Investment in subsidiaries is accounted using the cost method where the investment in subsidiaries is recognized at acquisition cost less impairment losses. Impairment is determined for each investment separately and is recognized in the income statement.

An impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, if no impairment loss had been recognized.

4-5 Non-current assets held for sale

Non-current assets and disposal groups are classified as held for sale if their carrying amount will be recovered through a sale transaction rather than through continuing use.

Non-current assets (and disposal groups) classified as held for sale are measured at the lower of carrying amount and fair value less costs to sell.

Impairment losses on initial classification as held-for-sale or held-for distribution and subsequent gains and losses on re-measurement are recognized in profit or loss.

Once classified as held-for-sale, intangible assets and property, plant and equipment are no longer amortized or depreciated, and any equity-accounted investee is no longer equity accounted.

4-6 Financial instruments

4-6-1 Recognition and initial measurement

Trade receivables and debt securities issued are initially recognized when they are originated. All other financial assets and financial liabilities are initially recognized when the Company becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

Classification and subsequent measurement

Financial assets

On initial recognition, a financial asset is classified as measured at: amortized cost; FVOCI debt investment; FVOCI — equity 'investment; or FVTPL

Financial assets are not reclassified subsequent to their initial recognition unless the Company changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

A financial asset is measured at amortized cost if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is to hold assets to collect contractual cash flows; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

On initial recognition of an equity investment that is not held for trading, the Company may irrevocably elect to present subsequent changes in the investment's fair value in OCI. This election is made on an instrument- by- instrument basis.

All financial assets not classified as measured at amortized cost or FVOCI as described above are measured at FVTPL. This includes all derivative financial assets.

On initial recognition, the Company may irrevocably designate a financial asset that otherwise meets the requirements to be measured at amortized cost or at FVOCI as at FVTPL if doing so eliminates or significantly reduces an accounting mismatch that would otherwise arise.

4-6-2 Financial assets — Business model assessment

- The Company makes an assessment of the objective of the business model in which a financial asset is held at a portfolio level because this best reflects the way the business is managed and information is provided to management. The information considered includes:

- The stated policies and objectives for the portfolio and the operation of those policies in practice. These include whether management's strategy focuses on earning contractual interest income, maintaining a particular interest rate profile, matching the duration of the financial assets to the duration of any related liabilities or expected cash outflows or realizing cash flows through the sale of the assets;
- How the performance of the portfolio is evaluated and reported to the Company's management;
- The risks that affect the performance of the business model (and the financial assets held within that business model) and how those risks are managed;
- How managers of the business are compensated — e.g., whether compensation is based on the fair value of the assets managed or the contractual cash flows collected; and
- The frequency, volume and timing of sales of financial assets in prior periods, the reasons for such sales and expectations about future sales activity.
- Transfers of financial assets to third parties in transactions that do not qualify for derecognition are not considered sales for this purpose, consistent with the Company's continuing recognition of the assets.
- Financial assets that are held for trading or are managed and whose performance is evaluated on a fair value basis are measured at FVTPL.

4-6-3 Financial assets — Assessment whether contractual cash flows are solely payments of principal and interest

For the purposes of this assessment, 'principal' is defined as the fair value of the financial asset on initial recognition. 'Interest' is defined as consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time and for other basic lending risks and costs (e.g. liquidity risk and administrative costs), as well as a profit margin.
In assessing whether the contractual cash flows are solely payments of principal and interest, the Company considers the contractual terms of the instrument. This includes assessing whether the financial asset contains a contractual term that could change the timing or amount of contractual cash flows such that it would not meet this condition. In making this assessment, the Company considers:
Contingent events that would change the amount or timing of cash flows;

- terms that may adjust the contractual coupon rate, including variable- rate features.
- Prepayment and extension features; and
- Terms that limit the Company's claim to cash flows from specified assets (e.g. non- recourse features).
- A prepayment feature is consistent with the solely payments of principal and interest criterion if the prepayment amount substantially represents unpaid amounts of principal and interest on the principal amount outstanding, which may include reasonable compensation for early termination of the contract.

  Additionally, for a financial asset acquired at a discount or premium to its contractual paramount, a feature that permits or requires prepayment at an amount that substantially represents the contractual par amount plus accrued (but unpaid) contractual interest (which may also include reasonable compensation for early termination) is treated as consistent with this criterion if the fair value of the prepayment feature is insignificant at initial recognition

4-6-4 Financial assets - Subsequent measurement and gains and losses

Financial assets at FVTPL	These assets are subsequently measured at fair value. Net gains and losses, including any interest or dividend income, are recognized in profit or loss.
Financial assets at amortized cost	These assets ate subsequently measured at amortized cost using the effective interest method. The amortized cost is reduced by impairment losses. Interest income, foreign exchange gains and losses and impairment are recognized in profit or loss. Any gain or loss on derecognition is recognized in profit or loss.
Debt investments at FVOCI	These assets are subsequently measured at fair value. Interest income calculated using the effective interest method, foreign exchange gains and losses and impairment are recognized in profit or loss. Other net gains and losses are recognized in OCI. On derecognition, gains and losses accumulated in OCI are reclassified to profit or loss.
Equity investments at FVOCI	These assets are subsequently measured at fair value. Dividends are recognized as income in profit or loss unless the dividend clearly represents a recovery of part of the cost of the investment. Other net gains and losses are recognized in OCI and are never reclassified to profit or loss.

4-6-5 Financial liabilities — Classification, subsequent measurement and gains and losses

Financial liabilities are classified as measured at amortized cost or FVTPL. A financial liability is classified as at FVTPL if it is classified as held- for- trading, it is a derivative or it is designated as such on initial recognition. Financial liabilities at FVTPL are measured at fair value and net gains and losses, including any interest expense, are recognized in profit or loss. Other financial liabilities are subsequently measured at amortized cost using the effective interest method. Interest expense and foreign exchange gains and losses are recognized in profit or loss. Any gain or loss on derecognition is also recognized in profit or loss.

4-6-6 Derecognition

Financial assets

The Company derecognized a financial asset when the contractual rights to the cash flows from the financial asset expire, or it transfers the rights to receive the contractual cash flows in a transaction in which substantially all of the risks and rewards of ownership of the financial asset are transferred or in which the Company neither transfers nor retains substantially all of the risks and rewards of ownership and it does not retain control of the financial asset.

The Company enters into transactions whereby it transfers assets recognized in its statement of financial position, but retains either all or substantially all of the risks and rewards of the transferred assets. In these cases, the transferred assets are not derecognized.

Financial liabilities

The Company derecognizes a financial liability when its contractual obligations are discharged or cancelled, or expire. The Company also derecognizes a financial liability when its terms are modified and the cash flows of the modified liability are substantially different, in which case a new financial liability based on the modified terms is recognized at fair value.

On derecognition of a financial liability, the difference between the carrying amount extinguished and the consideration paid (including any non- cash assets transferred or liabilities assumed) is recognized in profit or loss.

4-6-7 Offsetting

Financial assets and financial liabilities are offset and the net amount presented in the statement of financial position when, and only when, the Company currently has a legally enforceable right to set off the amounts and it intends either to settle them on a net basis or to realize the asset and settle the liability simultaneously.

4-7 Inventory

Inventory is valued at the end of the year at which is lower of cost or net realizable value according to the following basis:

- Raw materials, Spare parts, packaging materials, are determined using the moving average method.
- Cost of work in process is determined at industrial cost which include materials used in its production and direct wages in addition to its related direct and indirect industrial expenses up to the production stage that have been reached.
- Cost of finished products at which is lower of cost or net realizable value includes all the direct and indirect industrial expenses.

4-8 Leases

The Egyptian Standard "Lease Contracts" No. (49) sets out the principles for the recognition, measurement, presentation and disclosure of leases. The objective is to ensure that lessees and lessors provide relevant information in a manner that faithfully represents those transactions. This information gives a basis for users of financial statements to assess the effect that leases have on the financial position, financial performance and cash flows of an entity.

At inception of a contract, an entity shall assess whether the contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

An entity shall determine the lease term as the non-cancellable period of a lease, together with both:

(A) periods covered by an option to extend the lease if the lessee is reasonably certain to exercise that option; and

(B) periods covered by an option to terminate the lease if the lessee is reasonably certain not to exercise that option.

As a lessee

At commencement or on modification of a contract that contains a lease component, the Company allocates the consideration in the contract to each lease component on the basis of its relative stand-alone prices. However, for the leases of property the Company has elected not to separate non -lease components and account for the lease and non -lease components as a single lease component .

The Company recognizes a right-of-use asset and a lease liability at the lease commencement date.

The right-of-use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received .

The right-of-use asset is subsequently depreciated using the straight-line method from the commencement date to the end of the lease term, unless the lease transfers ownership of the underlying asset to the Company by the end of the lease term or the cost of the right-of-use asset reflects that the Company will exercise a purchase option. In that case the right-of-use asset will be depreciated over the useful life of the underlying asset, which is determined on the same basis as those of property and equipment. In addition, the right- of- use asset is periodically reduced by impairment losses, if any, and adjusted for certain re-measurements of the lease liability .

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, and the Company's incremental borrowing rate. Generally, the Company uses its incremental borrowing rate as the discount rate .

The Company determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased .

Lease payments included in the measurement of the lease liability comprise the following :

- Fixed payments, including in - substance fixed payments ;
- Variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date ;
- Amounts expected to be payable under a residual value guarantee ;

and the exercise price under a purchase option that the Company is reasonably certain to exercise, lease payments in an optional renewal period if the Company is reasonably certain to exercise an extension option, and penalties for early termination of a lease unless the Company is reasonably certain not to terminate early .

The lease liability is measured at amortized cost using the effective interest method. It is re-measured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in the Company's estimate of the amount expected to be payable under a residual value guarantee, if the Company changes its assessment of whether it will exercise a purchase, extension or termination option or if there is a revised in- substance fixed lease payment .

When the lease liability is re-measured in this way, a corresponding adjustment is made to the carrying amount of the right- of- use asset or is recorded in profit or loss if the carrying amount of the right- of- use asset has been reduced to zero.

The Company presents right- of- use assets that do not meet the definition of investment property in 'property, plant and equipment' and lease liabilities in 'loans and borrowings' in the statement of financial position.

4-9 Borrowing Cost

Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset as part of the cost of that asset shall be capitalized. Capitalization of interest and commission should be ceased when the assets are substantially ready for intended use.

Other borrowing costs shall recognize as an expense in the period in which it incurs them in the finance expenses account using the effective interest rate method.

Capitalization of borrowing costs should be suspended during extended periods in which it suspends active development of a qualifying asset. Capitalization of borrowing costs should be ceased when substantially all the activities necessary to prepare the qualifying asset for its intended use or sale are complete.

4-10 Debtors and other debit accounts

Debtors and other debit accounts are stated at amortization cost using the effective interest rate less impairment loss of any amounts expected to be uncollected, and are classified as current assets. Amounts that are expected to be collected after more than one year are classified as non-current assets.

4-11 Treasury Bills

Treasury Bills are recorded at face value, where the unearned revenue is recorded in the liabilities, accordingly the net treasury bills presented after deducting the unearned revenue.

4-12 Provisions

Provisions are recognized when the company has a legal or constructive obligation as a result of a past event, and it is probable that an out flow of economic benefits will be required to settle the obligation, and the obligation can be reasonably estimated, and if there is a significant effect of the monetary time value, the provisions are determined after deduction of future cash flow that are related to the obligation of payment by using the relevant deduction rate to take this effect into consideration. Provisions are reviewed at the financial position date and amended when necessary to reflect the best current estimate.

4-13 Revenue from contract with customers

An entity shall recognize revenue when (or as) the entity satisfies a performance obligation by transferring a promised good or service and when control of the goods or services is transferred to the customer at an amount that reflects the consideration to which the Company expects to be entitled in exchange for such transfer .

The company recognizes revenue from contracts with customers based on a five-step model as set out in IFRS (15) and is given below :

Step 1 - Identify the contract(s) with a customer: A contract is defined as an agreement between two or more parties that creates enforceable rights and obligations and sets out the criteria for every contract that must be met ;

Step 2 - Identify the performance obligations in the contract: A performance obligation is a promise in a contract with a customer to transfer a good or service to the customer ;

Step 3 - Determine the transaction price: The transaction price is the amount of consideration to which the company expects to be entitled in exchange for transferring promised goods or services to a customer, excluding amounts collected on behalf of third parties ;

Step 4 - Allocate the transaction price to the performance obligations in the contract: For a contract that has more than one performance obligation, the company allocates the transaction price to each performance obligation in an amount that depicts the amount of consideration to which the company expects to be entitled in exchange for satisfying each performance obligation ;

Step 5 - Recognize revenue when (or as) the entity satisfies a performance obligation .

The company satisfies the performance obligation and recognizes revenue over time, if one of the following criteria is met:

(A) The customer simultaneously receives and consumes the benefits provided by the entity's performance once the company has performed.

(B) Company performance creates or improves a customer-controlled asset at the same time as the asset is being constructed or improved.

(C) The performance of the company does not create an asset with an alternative use for the company, and that the company has an enforceable right to payment for performance completed to date.

For performance obligations, if any of the above conditions are not met, revenue is recognized at the point in time at which the performance obligation is satisfied .

If the company fulfils the performance obligation by providing the services that have been promised, this creates an asset based on a contract in exchange for consideration gained from performance. In the event that the consideration received by the customer exceeds the amount of revenue that has been recognized, a contract obligation may arise.

Revenue is measured at the fair value of the consideration received or receivable, after taking into account the contractual terms of payment, and after excluding taxes and fees. The company reviews its revenue arrangements against specific criteria to ascertain whether it is acting as principal or agent .

Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and that revenue and costs, where applicable, can be measured reliably.

4-14 Dividends and interest income

- Income from investments is recognized when the cash distribution declared by the Investee Company and received.
- Interest income is recognized in the income statement using the effective interest method. The effective interest method is used for discounting the expected future cash flows and allocating the related interest income over the maturity period. The effective interest is calculated taking in consideration the contractual arrangements.

4-15 Legal reserve

According to the company's statutes the Company is required to set aside 5% of the annual net profit to form a legal reserve. The transfer to legal reserve ceases once the reserve reach 50% of the issued share capital. If the reserve falls below the defined level (50% of the issued share capital), then the Company is required to resume setting aside 5% of the annual net profit until it reaches 50% of the issued share capital.

4-16 Treasury shares

Treasury shares are stated at cost, and shall be deducted from equity. No gain or loss shall be recognized in profit or loss on the purchase, sale, issue or cancellation of an entity's own equity instruments. Gain or loss on the dispose of the shares shall be recognized directly in equity.

4-17 Impairment

A- Financial assets

The company assesses on a forward-looking basis the expected credit loss associated with its debt instruments carried at amortized cost and FVOCI. The impairment methodology applied depends on whether there has been a significant increase in credit risk. For trade receivables, the company applies the simplified approach permitted by EAS 47, which requires expected lifetime losses to be recognized over the expected life of a financial instrument.

According to the FRA decision No. 4575 of 2023 the company has excluded governmental debt instruments in local currency, current account and term deposit in local currency at local Banks registered with the central Bank of Egypt and due within of one month from the date of the financial statement form the recognition and measurement of expected credit losses.

B- Non-financial assets

At each reporting date, the Company reviews the carrying amounts of its non- financial assets (other than, investment property, contract assets and deferred tax assets) to determine whether there is any indication of impairment. If any such indication exists, then the asset's recoverable amount is estimated. Goodwill is tested annually for impairment.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or CGU s. Goodwill arising from a business combination is allocated to CGUs or groups of CGUs that are expected to benefit from the synergies of the combination.

- The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs to sell. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

  An impairment loss is recognized if the carrying amount of an asset or CGU exceeds its recoverable amount.

- Impairment losses are recognized in profit or loss. They are allocated first to reduce the carrying amount of any goodwill allocated to the CGU, and then to reduce the carrying amounts of the other assets in the CGU on a pro rata basis.

- An impairment loss in respect of goodwill is not reversed. For other assets, an impairment loss is reversed only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

4-18 Income tax

Income tax on the profit for the year comprises current and deferred tax. Income tax is recognized in the income statement except for the extent that it relates to items outside

profit or loss which is recorded whether in other comprehensive income or recorded directly in equity.

Current tax is the expected tax payable on taxable income for the year, using tax rates enacted or substantially enacted at the Separate financial position date, and any adjustment to tax payable in respect of previous year.

Deferred tax is recognized for temporary differences between the carrying amounts of assets and liabilities for financial purposes and the amount used for taxation purposes.

The amount of deferred tax provided is based on the expected manner of realization or settlement of the carrying amount of assets and liabilities, using tax rates enacted or substantively enacted at the Separate financial position date.

A deferred tax asset is recognized only to the extent that it is probable that future taxable profits will be available against extent that it is no longer probable that the related tax benefit will realize.

4-19 Employees' pension

A- Social Insurance and pension

The Company contributes to the government social insurance system for the benefit of its personnel in accordance with the social insurance law no. 79 of 1975 and its modifications. Limited Contributions are charged to income statement using the accrual basis of accounting.

B- Employees' profit share

The Company contributes an employees' profit share of 10% from net profit for the year after deducting the legal reserve and the accumulated losses, if any, not to exceed the total salaries for the year and the employees' profit share is recognized as liabilities when it is approved by the general assembly.

4-20 Contingent liabilities and commitments

Contingent liabilities and commitments shown out of the financial position as it is not represented actual assets or liabilities at the financial position date.

4-21 Related parties' transactions

Transactions with Related parties that are undertaken by the Company in the course of its ordinary transactions are recorded according to the conditions laid down by the company's management on the same bases of dealing with third party.

4-22 Cash flow statement

Separate Cash flow statement is prepared using the indirect method.

For purpose of preparing the Separate statement of cash flows, Cash and cash equivalents include cash, time deposits for a period not more than three months and treasury bills for a period not more than three months.

4-23 Comparative Figures

Comparative figures are reclassified whenever necessary to confirm with the current classification in the current period.

(All amounts in Egyptian Pounds unless otherwise stated)

33- FINANCIAL INSTRUMENTS AND RISK MANAGMENT

A- Credit Risk

Credit risk is the risk of financial loss to the Company if a customer or counterparty to a financial instrument fails to meet its contractual obligations and arises principally from the company's receivables from customers and all kind of receivables.

The company's management has established a credit policy under which each customer is analysed individually for creditworthiness and these limits are reviewed on an on-going basis.

The maximum exposure to credit risk at the date of the Separate financial statements as follows:

	Note №	30/9/2026	31/12/2025
Trades and notes receivable	(11)	1 637 765 154	1 589 727 461
Debtors and other debit accounts	(12)	1 241 867 233	698 158 146
		2 879 632 387	**2 287 885 607**

B- Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquidity to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation.

The company confirmed it is acquired enough amount of cash to meet operating expenses. In addition, the company to preserve the credit facility granted to it by banks.

C- Market risk

The risk of market price changes that arise from changes in exchange rates and interest rates of securities that may affect the Group's income or the cost of retaining financial instruments - if any.

Exchange rate risk

This risk is in the fluctuations in the value of financial instruments as a result of fluctuations in foreign currency exchange rates and that of financial assets and liabilities denominated in foreign currencies resident.

This risk is considered acceptable because of the assets in foreign currency correspond to the company's obligations in foreign currencies.

The monetary assets and liabilities at the financial position date are equivalent to L. E 1 980 831 695 and L.E 1 732 116 109 respectively.

At the Separate financial position date, the net balances of foreign currencies as follows: -

Foreign currencies	Surplus/(Deficit)
USD	7 427 536
Euro	(2 330 664)
GBP	(1 903)

As explained in Note (4-1) "Foreign currency translation", the balances of assets and liabilities of a monetary nature denominated in foreign currencies described above have been assessed using the exchange rates declared by the banks with which the Company deals at the reporting date.

Interest rate risk

Interest rate risk is the risk resulting from changes in interest rate on the banks facility granted to the company. The Company obtains the best available conditions in the banking market for the credit facilities and reviews the prevailing interest rate in the banking market on an on-going-basis which minimizes the risk of changes in interest rates.

D - Capital Management

The Group manages its capital to ensure that entities in the Group will be able to continue as going concerns while maximising the return to shareholders and other beneficiaries who are using the financial statements through the optimal use of equity. Management seeks the best alternatives to maintain a better capital structure for the group through either dividend payment to shareholders, capital reduction, issuance of new shares, and or debt settlement.
